Age of Auto Electric Matthew N. Eisler,2022-12-06 The electric vehicle revival reflects negotiations between public policy which promotes clean fuel efficient vehicles and the auto industry which promotes high performance vehicles Electric cars were once as numerous as internal combustion engine cars before all but vanishing from American roads around World War I Now we are in the midst of an electric vehicle revival and the goal for a sustainable car seems to be within reach In Age of Auto Electric Matthew N Eisler shows that the halting development of the electric car in the intervening decades was a consequence of tensions between environmental energy and economic policy imperatives that informed a protracted reappraisal of the automobile system These factors drove the electric vehicle revival argues Eisler hastening automaking s transformation into a science based industry in the process Challenging the common assumption that the electric vehicle revival is due to the development of better batteries Age of Auto Electric instead focuses on changing environmental and socioeconomic conditions energy and environmental policies systems of energy conversion and industrial production and innovation practices that affected the prevalence and popularity of electric vehicles in recent decades Eisler describes a world in transition from legacy to alternative energy conversion systems and the promises compromises new problems and unintended consequences that enterprise has entailed

The No-BS Guide To DIY Powerwalls Kelly Hohnholz,2020-12-25 The Guide to DIY Powerwalls was the first of a 3 part series I started in May of 2020 during the height of the Pandemic that focused solely on creating a robust and extremely powerful power storage system similar to the Tesla Powerwall but on a shoestring budget One of the requirements would be its easy intergration into other off grid technologies The search led me to discovering how to repurpose large and relatively inexpensive batteries from wrecked Electric Vehicles EVs This book consists of 113 pages broken down into seven chapters which are Safety Planning Teardown Preparation Deployment and the P3 Portable Power Pack Builds The guide walks you through determining your energy usage and needs storage amounts locating suitable batteries at the best price and converting them into a usable battery bank This guide illustrates the conversion of a Ford C Max battery module but the principals apply to almost any EV battery out there Although a seemingly daunting task this book makes it easy with plenty of pictures careful explanations and a sprinkling of humor This book will be useful to everyone from the novice to the expert alike

Building the U.S. Battery Industry for Electric Drive Vehicles National Research Council,Policy and Global Affairs,Board on Science, Technology, and Economic Policy,Committee on Competing in the 21st Century: Best Practice in State and Regional Innovation Initiatives,Subcommittee on Electric Drive Battery Research and Development Activities,2013-01-03 Since 1991 the National Research Council under

the auspices of the Board on Science Technology and Economic Policy has undertaken a program of activities to improve policymakers understandings of the interconnections of science technology and economic policy and their importance for the American economy and its international competitive position The Board s activities have corresponded with increased policy recognition of the importance of knowledge and technology to economic growth The goal of the this symposium was to conduct two public symposia to review and analyze the potential contributions of public private partnerships and identify other relevant issues for the Department of Energy Office of Vehicle Technologies Energy Storage Team s activities in the energy storage research and development area The symposia will also identify lessons from these and other domestic and international experiences to help inform DoE as to whether its activities are complete and appropriately focused Additional topics that emerge in the course of the planning may also be addressed Building the U S Battery Industry for Electric Drive Vehicles Summary of a Symposium gathers representatives from leading battery manufacturers automotive firms university researchers academic and industry analysts congressional staff and federal agency representatives An individually authored summary of each symposium will be issued The symposium was held in Michigan in order to provide direct access to the policymakers and industrial participants drawn from the concentration of battery manufacturers and automotive firms in the region The symposium reviewed the current state needs and challenges of the U S advanced battery manufacturing industry challenges and opportunities in battery R collaborations between the automotive industry and battery industry workforce issues and supply chain development It also focused on the impact of DoE s investments and the role of state and federal programs in support of this growing industry This task of this report is to summarize the presentations and discussions that took place at this symposium Needless to say the battery industry has evolved very substantially since the conference was held and indeed some of the caveats raised by the speakers with regard to overall demand for batteries and the prospects of multiple producers now seem prescient At the same time it is important to understand that it is unrealistic to expect that all recipients of local state or federal support in a complex and rapidly evolving industry will necessarily succeed A number of the firms discussed here have been absorbed by competitors others have gone out of business and others continue to progress
