Outside the Box Marc Levinson, 2021-09-28. The author offers a brief history of globalization through the stories of the people and companies that built global supply chains. The two spheres, the private sector and government, did not go global in tandem, and many developments in one sphere were far more impactful in the other than imagined at the time. The book narrates the development of global supply chains in response to trends in both, telling stories ranging from a Prussian-born trader in New Jersey in the 1760s who dreamed of building a vertically integrated metals empire to new megaships too big to call on most of the world's ports, leaving half empty as globalization entered a new stage in its history around 2006. Bringing the story up to the early 2020s, the author illustrates how we're not experiencing the end of globalization, only its transformation. As one type of globalization is declining, a new one is on the rise.

[iPhone User Interface Design Projects](#) Joachim Bondo, David Barnard, Dan Burcaw, Tim Novikoff, Craig Kemper, Chris Parrish, Keith Peters, Jürgen Siebert, Eddie Wilson, Brian Wilson, Ingo Peters, Michael Kemper, 2010-04-28. With over 100,000 iPhone applications and 125,000 registered iPhone developers, is it still possible to create a top-selling app that stands apart from the six-figure crowd? Of course, but you'll need more than a great idea and flawless code. An eye-catching and functional user interface design is essential. With this book, you'll get practical advice on user interface design from 10 innovative developers who, like you, have sat wondering how to best utilize the iPhone's minimal screen real estate. Their stories illustrate precisely why, with more apps and more experienced creative developers, no iPhone app can succeed without a great user interface. Whatever type of iPhone project you have in mind—social networking app, game, or reference tool—you'll benefit from the information presented in this book. More than just tips and pointers, you'll learn from the authors' hands-on experiences, including Dave Barnard of AppCubby on how to use Apple's user interface conventions and test for usability to assure better results. Joachim Bondo, creator of Deep Green Chess, beats a classic design problem of navigating large dataset results in the realm of the iPhone. Former Apple employee Dan Burcaw tailors user interfaces and adds the power of CoreLocation, Address Book, and Camera to the social networking app Brightkite. David Kaneda takes his Basecamp project management client Outpost from a blank page, literally, to a model of dashboard.
