*MotorBoating* , 2009-10 *Ludicrous* Edward Niedermeyer, 2019-08-20 Tesla is the most exciting car company in a generation but can it live up to the hype Tesla Motors

and CEO Elon Musk have become household names shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom. The company's market valuation now rivals that of long established automakers and to many industry observers Tesla is defining the future of the industry. But behind the hype Tesla has some serious deficiencies that raise questions about its sky high valuation and even its ultimate survival. Tesla's commitment to innovation has led it to reject the careful zero defects approach of other car manufacturers even as it struggles to mass produce cars reliably and with minimal defects. While most car manufacturers struggle with the razor thin margins of mid priced sedans Tesla's strategy requires that the Model 3 finally bring it to profitability even as the high priced Roadster and Model S both lost money. And Tesla's approach of continually focusing on the future even as commitments and deadlines are repeatedly missed may ultimately test the patience of all but its most devoted fans. In Ludicrous journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day to day realities of the company and the cars it produces. Blending original reporting and never before published insider accounts with savvy industry analysis Niedermeyer tells the story of Tesla as it's never been told before with clear eyes objectivity and insight.

**Tesla** Krissy Eberth, 2025-07-10 Tesla began its journey as Tesla Motors on July 1 2003. It was founded by Martin Eberhard and Marc Tarpenning. They chose the name Tesla because it was catchy it did not sound too green and it honored Nikola Tesla. Elon Musk joined Tesla in 2004 as an investor. Musk was the driving force behind multiple rounds of additional funding. He helped Tesla raise more than 105 million from well known people such as Google cofounders Larry Page and Sergey Brin. His popularity created buzz around Tesla. Start Your Engine. Despite a short history Tesla has become one of the most famous automakers in the world. It has changed the EV industry by creating and following what it calls its master plan. What started as an interest in making a fast and fun electric car has led to new and exciting products and technology. Hold On to Your Hat. Tesla had figured out how to use lithium ion batteries to power its 100 000 electric sports car but it did not have an answer yet on how to charge them. Originally the Roadster took 24 to 48 hours to fully charge. By comparison it takes only minutes to fill a gas tank. After much research and development Tesla engineers came up with Supercharger technology.
