The impact and effectiveness of ministerial reshuffles Great Britain: Parliament: House of Commons: Political and Constitutional Reform Committee, 2013-06-14 Reshuffles are damaging to the effectiveness of individual Ministers and of Government as a whole They also hinder Parliament s ability to hold Government to account Every time there is a reshuffle it is proceeded by months of speculation about who will move where which in itself causes a kind of paralysis within Government The Committee calls for Secretaries of State to be left in post for the length of a Parliament Taken together with the advent of fixed term Parliaments this should enable them to make a real difference Some reshuffling of ministers is inevitable because of resignations and illness but reshuffles have become a habit in the UK The majority of the Committee concluded that there should be a specific Minister in the Cabinet Office who is responsible for ministerial development He or she should oversee ministerial training and appraisal There should also be compulsory training for all new Ministers continuous professional development for experienced Ministers and basic ministerial training for shadow Ministers in the 12 months before the expected date of a general election Outgoing Ministers should handover directly to their successors rather than relying exclusively on the civil service to conduct handovers

Mathematics and Transition to School Bob Perry, Amy

MacDonald, Ann Gervasoni, 2015-01-09 This edited book brings together for the first time an international collection of work focused on two important aspects of any young child's life learning mathematics and starting primary or elementary school. The chapters take a variety of perspectives and integrate these two components in sometimes explicit and sometimes more subtle ways. The key issues and themes explored in this book are the mathematical and other strengths that all participants in the transition to school bring to this period of a child's life, the opportunities provided by transition to school for young children's mathematics learning, the importance of partnerships among adults and among adults and children for effective school transitions and mathematics learning, and teaching the critical impact of expectations on their mathematics learning as children start school, the importance of providing children with meaningful challenging and relevant mathematical experiences throughout transition to school, the entitlement of children and educators to experience assessment and instructional pedagogies that match the strengths of the learners and the teachers, the importance for the aspirations of children, families, communities, educators and educational organisations to be recognised as legitimate and key determinants of actions, experiences and successes in both transition to school and mathematics learning, and the belief that young children are powerful mathematics learners who can demonstrate this power as they start school. In each chapter authors reflect on their work in the area of mathematics and transition to school, place that work within the overall context of research in these fields, predict the trajectory of this work in the future and consider the implications of the work both theoretically and practically.

What's Left Now? Andrew Hindmoor, 2018-01-26 Our sense of history shapes how we think about ourselves One of the distinguishing features of the left in Britain is that it holds to a remorselessly bleak and miserabilist view of our recent political history one in which Margaret Thatcher's election in 1979 marked the start of a still continuing fall from political grace made evident by the triumph of a free market get what you can neoliberal ideology dizzying levels of inequality social decay rampant individualism state authoritarianism and political corruption The left does not like what has happened to us and it does not like what we have become Andrew Hindmoor argues that this history is wrong and self harming It is wrong because Britain has in many respects become a more politically attractive and progressive country over the last few decades It is self harming because this bleak history undermines faith in politics Post Brexit post Grenfell and post the 2010 2015 and 2017 general elections things may not right now look that great But looked at over the longer haul Britain is a long way from

being a posterchild for neoliberalism Left wing ideas and arguments have shaped and continue to shape our politics
