Confessions of a School Reformer Larry Cuban, 2022-10-18 In *Confessions of a School Reformer* eminent historian of education Larry Cuban reflects on nearly a century of education reforms and his experiences with them as a student educator and administrator Cuban begins his own story in the 1930s when he entered first grade at a Pittsburgh public school the youngest son of Russian immigrants who placed great stock in the promises of education With a keen historian's eye Cuban expands his personal narrative to analyze the overlapping social political and economic movements that have attempted to influence public schooling in the United States since the beginning of the twentieth century He documents how education both has and has not been altered by the efforts of the Progressive Era of the first half of the twentieth century the Civil Rights Movement of the 1950s through the 1970s and the standards based school reform movement of the 1980s through today Cuban points out how these dissimilar movements nevertheless shared a belief that school change could promote student success and also forge a path toward a stronger economy and a more equitable society He relates the triumphs of these school reform efforts as well as more modest successes and unintended outcomes Interwoven with Cuban's evaluations and remembrances are his confessions in which he accounts for the beliefs he held and later rejected as well as mistakes and areas of weakness that he has found in his own ideology Ultimately Cuban remarks with a tempered optimism on what schools can and cannot do in American democracy

doctors and on archival material from relevant women's organisations. It shows how the childbirth and breastfeeding movements are relevant to feminism and women's rights. Much has been achieved but Reiger sees a need for still more political action. Any woman who has given birth and anyone who has cared for mothers and babies will want to read this book.

Education Reform: The Unwinding of Intelligence and Creativity Des Griffin, 2013-12-19. This book pays special attention to the impact that a student's early childhood and socioeconomic status has on his or her educational achievement. It argues that discussions of education reform need a broader scope, one that encompasses a student's background as well as standardized testing, merit pay for teachers, and other issues regarding the quality of the teaching and learning. *Education Reform: The Unwinding of Intelligence and Creativity* features cases and examples from schools in Australia, the USA, and Britain. It offers a breadth of coverage from early childhood to effective teaching and learning, to teacher pay and conditions, standardized testing, and public and private independent schooling and universities, as well as creativity. It also includes summaries of educational policies in many developed countries. Reforms which emphasize concern for early childhood, school leadership, and respect for teachers are contrasted with ones based on standardized tests, private schools, and sacking bad teachers.
