Measuring Strategies in Tactile Coordinate Metrology Robert Roithmeier, 2014-10-24 Today there is hardly any workpiece whose form parameters cannot be measured by means of coordinate measuring machines The universal use of these machines allows a wide range of application of this technology which however increases inevitably the complexity of its handling The numerous options of the machine specific operating software on the one hand and the various theoretical considerations regarding a target oriented treatment of measuring jobs on the other hand result in the fact that the measuring results obtained from the same coordinate measuring machine on the same workpiece under similar conditions may differ In Order to increase the comparability of measuring results it is necessary to provide the operators of coordinate measuring machines in addition to a well founded AUKOM training with procedure options for planning performing evaluating and documenting measurements This book by the ZEISS Metrology Academy makes a contribution towards achieving these targets

Good Cascade Impactor Practices, AIM and EDA for Orally Inhaled Products Terrence P. Tougas,Jolyon P. Mitchell,Svetlana A. Lyapustina,2013-04-10 The purpose of this publication is to introduce a new simpler and more effective way in which to interpret pharmaceutical aerosol particle size data from orally inhaled products OIPs Currently the compendial and regulatory requirements dictate the need for measurements by full resolution multi stage cascade impactor CI a process that is demanding for the operator time consuming prone to experimental error and challenging for method transfers from one laboratory to another Furthermore we shall show that the current practice of reducing information from mass weighted aerodynamic particle size distribution APSD measurements through the use of CI stage groupings is not the most effective decision making tool for OIP quality control QC in comparison with newly introduced mutually independent efficient data analysis EDA metrics that can be derived either from full resolution or abbreviated impactor measurements AIM
