

Wegman Report 2006

Wegman, Chairman of U.S. NAS Committee on Applied Statistics:

“The debate over Dr. Mann’s principal components methodology has been going on for nearly three years. When we got involved, there was no evidence that a single issue was resolved or even nearing resolution. Dr. Mann’s RealClimate.org website said that all of the Mr. McIntyre and Dr. McKittrick claims had been ‘discredited’. UCAR had issued a news release saying that all their claims were ‘unfounded’. Mr. McIntyre replied on the ClimateAudit.org website. The climate science community seemed unable to either refute McIntyre’s claims or accept them. The situation was ripe for a third-party review of the types that we and Dr. North’s NRC panel have done.

Michael Mann And Wegman Report:

Assessing Climate Change Donald Rapp, 2014-07-15 This updated and revised new edition of Assessing Climate Change deals with the full gamut of essential questions in relation to global warming and climate change uniquely providing a balanced and impartial discussion of this controversial subject It shows that most of what is known about the Sun historical climates and projections for the future lacks foundation and leaves great room for doubt Assessing Climate Change 3rd Edition examines the credibility of the global climate models which accuse greenhouse gases of causing the temperature rise of the 20th century and provides a better understanding of the uncertainties regarding what might lie ahead in the future Carefully considering the evidence brought forward by both alarmists and skeptics this book has been brought completely up to date to end 2013 examines the measurements of near surface temperatures on Earth and how much we can rely on them includes hundreds of graphs showing the data compares the current global warming trend with past climate fluctuations provides a systematic review of climate change in nearly all of its aspects expands the discussion of potential impacts of global warming from whatever cause includes nearly 1000 references specific to the climate literature

The Hockey Stick and the Climate Wars Michael E. Mann, 2013-10-01 The ongoing assault on climate science in the United States has never been more aggressive more blatant or more widely publicized than in the case of the Hockey Stick graph a clear and compelling visual presentation of scientific data put together by Michael E Mann and his colleagues demonstrating that global temperatures have risen in conjunction with the increase in industrialization and the use of fossil fuels Here was an easy to understand graph that in a glance posed a threat to major corporate energy interests and those who do their political bidding The stakes were simply too high to ignore the Hockey Stick and so began a relentless attack on a body of science and on the investigators whose work formed its scientific basis The Hockey Stick achieved prominence in a 2001 UN report on climate change and quickly became a central icon in the climate wars The real issue has never been the graph s data but rather its implied threat to those who oppose governmental regulation and other restraints to protect the environment and planet Mann lead author of the original paper in which the Hockey Stick first appeared shares the story of the science and politics behind this controversy He reveals key figures in the oil and energy industries and the media front groups who do their bidding in sometimes slick sometimes bare knuckled ways Mann concludes with the real story of the 2009 Climategate scandal in which climate scientists emails were hacked This is essential reading for all who care about our planet s health and our own well being

Politics and Climate Change: A History Andy May, 2022-09-04 These are stories of the political corruption of science Politicians work to forge a consensus they use persuasion intimidation and avoid or suppress debate

Debating an issue leads to education it shows the question is more complex than it appears it makes the public consider all sides Education leads to caution not action The politician wants a decision he wants action so no debate Once the consensus is formed the public votes laws are passed regulations issued the minority concedes and conflict is avoided Science is not a belief It exists to challenge the consensus view It is how one person can show the overwhelming majority is mistaken Scientists do not vote they debate They gather facts make observations and analyze the data and try to show the consensus opinion is wrong Politicians and scientists don't mix They are like fire and water opposites But what about when no one trusts the politician and he must have a scientist for back up What happens when the government becomes the sole source of research money We address the attempt by politicians to control scientific research and research outcomes They do this by selectively funding projects that look for potential disasters ideally global disasters People love disaster stories journalists love disaster stories scientists love to be quoted in newspapers and on television If you frighten people enough they will give up their rights for security increasing government power So it is not surprising that as government has taken over funding scientific research scientists have migrated from research that helps people to researching possible catastrophes no matter how remote the possibility Science has devolved from improving human lives to developing plots for disaster movies

Networked Media, Networked Rhetorics Damien Smith Pfister, 2015-06-10 In *Networked Media Networked Rhetorics* Damien Pfister explores communicative practices in networked media environments analyzing in particular how the blogosphere has changed the conduct and coverage of public debate Pfister shows how the late modern imaginary was susceptible to deliberation traps related to invention emotion and expertise and how bloggers have played a role in helping contemporary public deliberation evade these traps Three case studies at the heart of *Networked Media Networked Rhetorics* show how new intermediaries including bloggers generate publicity solidarity and translation in the networked public sphere Bloggers flooding the zone in the wake of Trent Lott's controversial toast to Strom Thurmond in 2002 demonstrated their ability to invent and circulate novel arguments the pre 2003 invasion reports from the Baghdad blogger illustrated how solidarity is built through affective connections and the science blog RealClimate continues to serve as a rapid response site for the translation of expert claims for public audiences *Networked Media Networked Rhetorics* concludes with a bold outline for rhetorical studies after the internet

Climate Change Brian C. Black, David M. Hassenzahl Ph.D., Jennie C. Stephens, Gary J. Weisel, Nancy Gift, 2013-01-08 This book provides a holistic consideration of climate change that goes beyond pure science fleshing out the discussion by considering cultural historical and policy driven aspects of this important issue Climate change is a controversial topic that promises to reframe rudimentary ideas about our world and how we will live in it The articles in *Climate Change An Encyclopedia of Science and History* are designed to inform readers decision making through the insight of scholars from around the world each of whom brings a unique approach to this topic The work goes beyond pure science to consider other important factors weighing the cultural historical and policy driven

contributors to this issue In addition the book explores the ideas that have converged and evolved in order to clarify our current predicament By considering climate change in this holistic fashion this reference collection will prepare readers to consider the issue from every angle Each article in the work is suitable for general readers particularly students in high school and college and is intended to inform and educate anyone about climate change providing valuable information regarding the stages of mitigation and adaptation that are occurring all around us **Denying Science** John

Grant,2011-10-04 Is global warming just scaremongering by climatologists conspiring to protect their jobs Is evolution just a theory Is autism caused by vaccinations The answer to all of these questions is of course no The scientific evidence is now in and it s conclusive on these and many more issues that are fundamental to our knowledge and wellbeing But you d never know this if all of your information came from the popular media or your upbringing and immediate circle of influence didn t include critical thinking and basic scientific literacy As this witty book with a very serious message shows our culture has in recent decades been characterized by a widespread antagonism toward science and the not always welcome messages it brings Large sections of the supposedly sophisticated populations in the developed nations are in an active state of denial Not only do they deny scientific evidence but they also call into question the very competence of science as a descriptor of reality In short they deny reality The author surveys the gamut of clearly unscientific ideas concerning the food we eat the medicines and potions we are either afraid of or advised to take our sex preferences and a host of other issues that are raised by various panics urban legends and a general climate of misinformation He also examines how special interests from agribusiness to pharmaceutical companies to creationists actively work to distort or suppress scientific findings While the tendency may be to laugh at some of the ridiculous notions catalogued in the author s overview of bogus ideas the overall picture he creates is anything but funny This book reminds the reader that the future of free increasingly complex societies depends on an educated citizenry that is able to think clearly and critically based on reliable information **Questions**

astounding twelve weeks As provocative well reasoned robust and informed as his on air commentary with his love of our country and the legacy of our Founding Fathers reflected on every page Levin s galvanizing narrative provides a philosophical historical and practical framework for revitalizing the conservative vision and ensuring the preservation of American society In the face of the modern liberal assault on Constitution based values an attack that has resulted in a federal government that is a massive unaccountable conglomerate the time for reinforcing the intellectual and practical case for conservatism is now In a series of powerful essays Levin lays out how conservatives can counter the tyrannical liberal corrosion that has filtered into every timely issue affecting our daily lives from the economy to health care global warming to immigration and more *Prosperity, Poverty or Extinction?* Allen Cookson,2012-12-11 In an unprecedented way this book relates fundamental physical and ecological principles to economics so that the detachment of current economic practices from physical reality becomes obvious Sustainable alternative models are proposed Almost all the material is derived from the work of great minds of past and present Forgotten and ignored ideas are resurrected Its a book for intelligent educated lay people students and academics That his forecasting is more successful than many prominent economists and that respected figures are turning to views long held by him gives the author confidence that his contribution is of value

Warmism as an ideology Rémy Prud'homme,2015-12-11 This essay does not deny the 0.6 to 0.8 C increase in global temperature that took place during the 20th century It tries to understand how and why this simple fact has been transformed into a militant social movement A clue is found in Hanna Arendt analyses of ideologies based on the nazi and soviet totalitarianisms All the key features of an ideology are present in warmism a monocausal explanation of everything and anything a reference reverence to science a massive intervention of the State a total war on a terrible evil CO2 designated as enemy n 1 although terrorism is now becoming a serious competitor and on all lukewarmers and finally a popular success

The book argues that the equation IPCC Science is highly questionable and that the consequences drawn and the projections predictions made for year 2100 are even more fragile It shows that the dominant warmist catechism recited by politicians and media goes much beyond this questionable scientific basis The medicines proposed and imposed under the pretext of saving the planet are discussed and shown to be generally unrealistic and regressive In particular contrary to what is claimed by our modern prophets they would prevent countries of Africa and South East Asia which are at last beginning to get themselves out of misery to stop doing so In short warmism is the ideology of the day and it is dangerous like all ideologies
