La nécessité en droit international Sarah Cassella, 2011-05-06 La Commission du droit international après avoir longuement hésité a inscrit l'état de nécessité dans sa codification de la responsabilité des États en tant que circonstance excluant l'illicé L'objet de cette étude est de montrer qu'il s'agit d'un mécanisme beaucoup plus diffus et fondamental du droit international intimement lié à ses caractéristiques propres Il a comme fonction la limitation des obligations substantielles des États lors de la survenance d'un fait condition la situation de nécessité afin d'éviter que l'application du droit ne génère un coût social excessif Sa réalisation requiert toujours une pondération des intérêts en conflit Seulement lorsqu'un coût social excessif ne peut être évité l'état de nécessité intervient dans le cadre des obligations secondaires de la responsabilité internationale en tant que circonstance atténuante

After much hesitation the International Law Commission codified the state of necessity as a circumstance precluding wrongfulness in the field of State responsibility This study aims to demonstrate that it is a much wider mechanism essential to international law and strictly connected to its own characteristics It performs the function of limiting the substantial obligations of States in case of the realization of a fact condition a situation of necessity in order to avert an excessive social cost born out of law implementation It always works through a balance of conflicting interests Only when a social cost cannot be avoided the state of necessity under the features of a mitigating circumstance enters the field of secondary obligations relating to international responsibility

Vigilance and the Plague Sébastien Demichel, Mark Sven Hengerer, 2024-04 This book focuses on the connection between vigilance and the plague in France throughout the 17th and 18th centuries For more than three centuries between the middle of the 14th century up until circa 1670 the prevalence of the plague in France was said to be endemic before it then vanished from French territory The Great Plague of Marseille 1720 1722 which also impacted the rest of Provence the County of Venaissin and Languedoc proved to be an exception During that period the fight against the plague was deemed a top priority along the French coast and health institutions called bureaux de la sant were developed Contributions to this book primarily focus on health vigilance from the standpoint of how to prevent an epidemic and how to respond to a declared epidemic Among the salient themes addressed are communications between health and different state actors prevailing religious and political norms and the popular participation in the fight against the plague The use of the concept of vigilance enables the mobilisation of often rather distant branches of history namely institutional social religious history the history of communication and the history of public health
