**The Writing Revolution** Judith C. Hochman, Natalie Wexler, 2017-08-07 Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach The model, also known as The Hochman Method, has demonstrated over and over that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference And the method does more than improve writing skills It also helps Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing There's no separate writing block and no separate writing curriculum Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well It breaks the writing process down into manageable chunks and then has students practice the chunks they need repeatedly while also learning content

**Building News Literacy** Tom Bober, 2021-01-05 Every upper elementary and middle school educator can teach news literacy and connected literacies including text, visual, graphic, and video literacy using this book This book suggests that news literacy is made up of several other literacies and skills that must not only be explored across the subject areas but also connected to students' real-world consuming and sharing habits A series of lessons, some using technology, lay a foundation for building these multiple literacies and skills While not meant to be a complete program, the lessons provide a holistic experience and are adaptable to personalize students' learning The author melds strategies for finding and making meaning from information, the multiple literacies that young consumers of news must be familiar with to navigate news and other information, and the digital skills necessary to navigate today's news options Whether students encounter news in the firewall-protected classroom or pushed out to them on their phones, the series of lessons encourage them to give pause and ask important questions as they move beyond simply consuming to

become critical readers of the news
