Fake News in Ancient Greece Diego De Brasi,Amphilochios Papathomas,Theofanis Tsiampokalos,2024-12-02 Scholars have recognized that fake news is not a phenomenon peculiar to the 21st century While efforts for a more focused approach to fake news in the ancient world have been carried out in the field of Roman history the phenomenon of fake news in ancient Greece has received limited attention The contributions in this volume offer a selective approach to this phenomenon by applying media and cultural studies instruments to ancient texts They pinpoint parallels and differences between ancient and modern fake news by employing methods of literary and cultural studies as well as historical documentary analysis of ancient sources In particular they explore questions such as To what extent does reflection on the concepts of truth lie and opinion influence ancient Greek political rhetorical discourse What is the political or social function of embedding misleading information in ancient Greek historiographical texts or pamphlets Which intentions are pursued with the help of fake news in literary and documentary texts Can parallels be drawn with modern approaches to fake news Thus the volume investigates the mechanisms that historically lay behind the creation dissemination and adaptation of misleading information Inside the Enemy's Computer Clement Guitton,2017-08-01 Attribution tracing those responsible for a cyber attack is of primary importance when classifying it as a criminal act an act of war or an act of terrorism Three assumptions dominate current thinking attribution is a technical problem it is unsolvable and it is unique Approaching attribution as a problem forces us to consider it either as solved or unsolved Yet attribution is far more nuanced and is best approached as a process in constant flux driven by judicial and political pressures In the criminal context courts must assess the guilt of criminals mainly based on technical evidence In the national security context decision makers must analyse unreliable and mainly non technical information in order to identify an enemy of the state Attribution in both contexts is political in criminal cases laws reflect society s prevailing norms and powers in national security cases attribution reflects a state s will to maintain increase or assert its power However both processes differ on many levels The constraints which reflect common aspects of many other political issues constitute the structure of the book the need for judgement calls the role of private companies the standards of evidence the role of time and the plausible deniability of attacks **Arab Digital Journalism** Noha Mellor,2022-11-30 Responding to urgent calls to de westernise Media and Journalism Studies and shed light on local agencies this book examines digital journalistic practices in the Arab region exploring how Arab journalists understand their roles and how digital technologies in Arab newsrooms are used to influence public opinion Drawing on dozens of articles penned by Arab media professionals and scholars supplemented with informal conversations with journalists this book reviews the historical development of digital journalism in the region and individual journalists perceptions of this development While technology has provided a new platform for citizens and powerful agents to exchange views this text examines how it has simultaneously allowed Arab states and authorities to conduct surveillance on journalists curtail the rise of citizen journalism and maintain

offline hierarchal forms of political economic and cultural powers Mellor also explores how digital technology serves to cement Western hegemony of the information world order with Arab media organisations and audiences judged to be mere recipients rather than producers of such information Arab Digital Journalism offers an important contribution to the emerging field of digital journalism in the Global South and is a valuable resource for students and researchers interested in media journalism communication and development studies The Russian Invasion of Ukraine, February - December 2022

John S Harrel, 2024-01-30 For the Military Enthusiast an intriguing view of the war through the eyes of a contemporary Western Military Officer ARGunners.com On 24 February 2022 Russian forces invaded Ukraine intending to overthrow the Zelensky government and bring the former Soviet republic back into the Russian sphere of control Vladimir Putin clearly expected a quick victory and many in the West also predicted that Kiev would fall in a few days But they hadn't counted on the skilled courageous and determined resistance of the Ukrainian armed forces nor the degree to which Russian military might had been overestimated The initial Russian dash for Kiev was thrown back and their advances in the east and south also slowed by a combination of fierce resistance and their own unpreparedness inadequate logistical planning and incompetent command While the Russians ground their way forward in the east and south of the country devastating towns and cities they paid a heavy price in casualties and equipment losses A carefully planned Ukrainian counteroffensive in the summer forced the invaders into a series of humiliating retreats As winter approached the Russians still held considerable territory but the initiative and strategic momentum had clearly swung to the defenders The illusion of Russian invincibility was shattered forever US Major General retired John S Harrel a graduate of the US Army War College trained with the Ukrainian army in the 1990s and in 2006 and commanded Ukrainian troops as part of the NATO force in Kosovo in 2005 His military expertise and detailed knowledge of the combatants informs this clear narrative and analysis of the course of the first 10 months of the war He gives the reasons for the failure of the Russian invasion and conversely explains how the Ukrainian defense exceeded expectations while acknowledging that strategic mistakes were made on both sides

Overseas Bases and US Strategy Jonathan Stevenson, 2022-08-01 Overseas military bases have been the bedrock of the United States ability to project military power exert political influence and deter potential adversaries since the Second World War But fatigue with America's forever wars as well as more nuanced financial and strategic reasons has inclined the public and policy community to favour reducing US global military activities and overseas presence In this Adelphi book Jonathan Stevenson argues that this desire does not necessarily translate into sound strategy Overseas bases are a key element of the reassurance required to resurrect and bolster America's reputation among its allies and adversaries Meanwhile strategic imperatives and geopolitical realities impose restraints in every theatre The fluidity prevailing in the Middle East and Indo Pacific counsels maintaining forward deployed forces there at roughly the current level Russia's confrontational posture towards NATO and invasion of Ukraine as well as NATO's short and medium term reliance on US

capabilities require the American presence in Europe to increase and expand eastward The US should not commit itself to a foreign policy that is heavy on forward deployed military power and light on diplomacy But paradoxically reducing forward military presence may not be consistent with a policy that is less focused on military power as a means of achieving stability and security
