A couple who traded their expensive Bay Area apartment for a slip at a nearby marina where they live on a docked sailboat. A family of five who decided to simplify their lives by moving into a school bus, selling most of their possessions in the process. Nomad features their stories and many more. It's now possible to do whatever you want from wherever you want and still have a foothold in the world. This book shows you how, with tours of 26 unconventional homes and the people who live in them, plus all the information you need to make your own off-the-grid dream a reality. There are chapters on bathroom and storage, two of the most challenging aspects of this lifestyle, plus a comprehensive guide to finding the right home, assessing the cost of renovation, handy products for small spaces, and indispensable resources, including sources for replacement RV parts, portable power solutions, tiny wood stoves, and much more.

Advanced Direct Injection Combustion Engine Technologies and Development H. Zhao, 2009-12-18 Volume 2 of the two-volume set, Advanced direct injection combustion engine technologies and development, investigates diesel DI combustion engines, which, despite their commercial success, are facing ever more stringent emission legislation worldwide. Direct injection diesel engines are generally more efficient and cleaner than indirect injection engines, and as fuel prices continue to rise, DI engines are expected to gain in popularity for automotive applications. Two exclusive sections examine light-duty and heavy-duty diesel engines. Fuel injection systems and after-treatment systems for DI diesel engines are discussed. The final section addresses exhaust emission control strategies, including combustion diagnostics and modelling, drawing on reputable diesel combustion system research and development. Investigates how HSDI and DI engines can meet ever more stringent emission legislation. Examines technologies for both light-duty and heavy-duty diesel engines. Discusses exhaust emission control strategies, combustion diagnostics, and modelling.
