Decedent:  
**ROLAND JARVIS**

Well... where to begin? I guess I'll start by pointing out the obvious: the body of Roland Jarvis is in a transitory form that has never existed before.

The tissue shows no signs of decay, although Jarvis has been clinically dead for over two weeks now. No rigor, no pooling of body fluids. The flesh remains pliable. Pupils remain clear.

Against my objections, I was instructed to remove part of the liver and attempted to destroy it using numerous methods. Fire, emulsion and caustic acids had no effect. While I could separate various organs and limbs of the decedent with vivisection, I could not destroy the tissue once I did so.

Even more disturbing was that a few moments later, the body would once again be fully whole.

I do not know the length of time this took. Seconds? Minutes?

I tried numerous times to record the moment when Jarvis' corpse would return to its pre-autopsy state, but I was never able to. It was as if my actions at "modifying" the corpse had never happened. Perhaps they didn't.
