Interdisciplinary and Transdisciplinary Failures Dena Fam,Michael O'Rourke,2020-11-01 Unlike other volumes in the current literature this book provides insight for interdisciplinary and transdisciplinary researchers and practitioners on what doesn t work Documenting detailed case studies of project failure matters not only as an illustration of experienced challenges but also as projects do not always follow step by step protocols of preconceived and theorised processes Bookended by a framing introduction by the editors and a conclusion written by Julie Thompson Klein each chapter ends with a reflexive section that synthesizes lessons learned and key take away points for the reader Drawing on a wide range of

international case studies and with a strong environmental thread throughout the book reveals a range of failure scenarios for interdisciplinary and transdisciplinary projects including Projects that did not get off the ground Projects that did not have the correct personnel for specified objectives Projects that did not reach their original objectives but met other objectives Projects that failed to anticipate important differences among collaborators Illustrating causal links in real life projects this volume will be of significant relevance to scholars and practitioners looking to overcome the challenges of conducting interdisciplinary and transdisciplinary research

Dialogues on Climate Justice Stephen M. Gardiner, Arthur Obst, 2022-09-26 Written both for general readers and college students *Dialogues on Climate Justice* provides an engaging philosophical introduction to climate justice and should be of interest to anyone wanting to think seriously about the climate crisis The story follows the life and conversations of Hope a fictional protagonist whose life is shaped by a terrifyingly real problem climate change From the election of Donald Trump in 2016 until the 2060s the book documents Hope s discussions with a diverse cast of characters As she ages her conversations move from establishing the nature of the problem to engaging with climate skepticism to exploring her own climate responsibilities through managing contentious international negotiations to considering big technological fixes and finally as an older woman to reflecting with her granddaughter on what one generation owes another Following a philosophical tradition established by Plato more than two thousand years ago these dialogues are not only philosophically substantive and carefully argued but also distinctly human The differing perspectives on display mirror those involved in real world climate dialogues going on today

Key Features Written in an engaging dialogue form which includes characterization clear exchanges of ideas and a compelling story arc Clearly organized to allow readers both in depth consideration and rapid overviews of various topics

Memorable examples that enable and encourage discussion inside and outside the classroom An Introduction to the book aimed at instructors which includes helpful instructions for teaching the book and engaging student assignments

The Physiological and Molecular Response of Aquatic Animals to Environmental Stresses Lingling Wang, Vengatesen Thiagarajan (Rajan), Guangxu Liu, Wei Xu, 2022-10-06

Ecological Living John Gusdorf, 2019-03-21 This book emphasizes how we already have the technologies available including renewable energy and the ability to recycle most materials to make ecological living possible and that perceived barriers to energy transitions can be overcome Human life relies upon two systems the biosphere and the system that produces our goods and services Today these two systems are in conflict and we all face the question of whether we can stop damaging our environment while still supplying the essential goods and services we have come to depend on Ecological Living presents an optimistic vision of our future by showing how decoupling the productive system from resource extraction is possible and how this is a key means of achieving an equitable world within environmental limits For long term sustainability the book argues that we must become more efficient in the use of our resources so that resource extraction and the accompanying environmental costs can be reduced Demonstrating the essential steps towards a just and sustainable world Ecological Living will be of great interest to all students academics and policymakers working in the field of environment and sustainability

The Spatial Dimension of Risk Hans-Detlef Müller-Mahn, 2013 Through its exploration of the spatial dimension of risk this book offers a brand new approach to theorizing risk and significant improvements in how to manage tolerate and take risks A broad range of risks are examined including natural hazards climate change political violence and state failure Case studies range from the Congo to Central Asia from tsunami in Japan and civil war affected areas in Sri Lanka to avalanche hazards in Austria In each of these cases the authors examine the importance and role of space in the causes and differentiation of risk in how we can conceptualize risk from a spatial perspective and in the relevance of space and locality for risk governance This new approach endorsed by Ragnar L. Fstetd and Ortwin Renn two of the world's leading and most prolific risk analysts is essential reading for those charged with studying anticipating and managing risks
