**Understanding Paul** Peter Frick,2023-09-04 Peter Frick argues that the key issue to which the apostle Paul correlates the death and resurrection of Jesus Christ is the power of sin Sin singular is an ontological existential category and distinct from sins plural For the death of Jesus to be effective in overcoming the power of sin salvation is established strictly in the new ontology of the resurrection of Jesus      Infrared Astronomical Satellite (IRAS) Catalogs and Atlases: The Point source catalog declination range 90° [greater than delta greater than] 30° ,1988      *The Kinesin Superfamily Handbook* Claire T. Friel,2020-05-13 This book brings together current information on the families that make up the kinesin superfamily of molecular motors in one comprehensive text an ideal reference for researchers looking to make comparisons between different families for specific information on an individual family or simply for an overview of the kinesin superfamily Information is clearly structured and grouped according to individual families and organised in a standardised way allowing the reader to easily search and retrieve information on this large superfamily of molecular motors and understand how its individual members carry out a diverse variety of cellular functions Features The first book dedicated to the entire kinesin superfamily Enables a fuller understanding of this family of proteins which is becoming an increasing focus of research due to its involvement in diseases such as cancer neuropathies and ciliopathies Written in a manner accessible to a range of researchers in the life and medical sciences including biophysicists biochemists and medical researchers Chapters 4 and 11 of this book are freely available as downloadable Open Access PDFs at [http www taylorfrancis com](http://www.taylorfrancis.com) under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license      **Infrared Astronomical Satellite (IRAS) Catalogs and Atlases: The Point source catalog declination range 00 [greater than delta greater than] -300** ,1988      *The Monthly Army List* Great Britain. more and more people are experiencing working in another culture Focusing on the real experiences of workers in Japanese transnational finance companies this book not only throws light on this specific case but at the same time raises timely questions and insights concerning the newly emerging multicultural work experiences world wide The Clash of Economic Cultures Japanese Bankers in the City of London reflects on contemporary discussions in sociology anthropology and cultural studies of individual global movement and cultural interaction While there are some studies on Japanese multinational companies in Europe they have typically assumed stereotyped differences in management systems and work cultures This book however breaks the mold by looking at the culture and individuals subjective views about their working lives and also their own worldviews this perspective illuminates the difficulties in working relationships between Japanese and Europeans Junko Sakai reveals through 100 transcribed interviews the influence of power relationships on people of different groups in terms of gender class and ethnicity The Clash of Economic Cultures shows uneven transformation of economic and cultural hegemony between East and West This book gives voice to Japanese men and women whose voices are rarely heard and to the British who have worked for non Westerners in the West It is also a significant and timely analysis of the increasing influence of non Western companies in London It will be of great interest to cultural anthropologists business historians sociologists and scholars in Japanese and Asian studies as well as those involved in international finance and management Junko Sakai lectures on British society in the English literature department at Ferris University in Yokohama Japan and teaches English at Rikkyo University in Tokyo Offers a rare and welcome insight into the inner lives and psychology of Japanese bankers Sakai delivers a rather unique anthropological interpretation of human narratives and life stories displaying a rich tapestry of interwoven discourses that are accentuated by us and them remarks The book is a fascinating read and the subject is one of considerable practical and theoretical significance Tomoko Hamada Records and Briefs of the United States Supreme Court ,1832 *Remodeling of cardiac passive electrical properties and susceptibility to ventricular and atrial arrhythmias* George E. Billman,2015-09-25 The effective management of cardiac arrhythmias either of atrial or of ventricular origin remains a major challenge Sudden cardiac death due to ventricular tachyarrhythmias remains the leading cause of death in industrialized countries while atrial fibrillation is the most common rhythm disorder an arrhythmia that s prevalence is increasing and accounts for nearly one quarter of ischemic strokes the elderly population Yet despite the enormity of the problem effective therapeutic interventions remain elusive In fact several initially promising antiarrhythmic agents were found to increase rather than decrease mortality in patients recovering from myocardial infarction The question then is what went wrong why have these interventions proven to be so ineffective An obvious answer is the drugs were designed to attack the wrong therapeutic target Clearly targeting single ion channels using either isolated ion channels or single myocytes preparations has proven to be less than effective What then is the appropriate target It is well established that cardiac electrical properties can vary substantially between single cells and intact preparations One

obvious example is the observation that action potential duration is much longer in isolated cells as compared to multi cellular preparations or intact hearts Due to the low electrical resistance between adjacent myocytes the cells act in coordinated fashion producing electrotonic interdependence between neighboring cells Myocardial infarction and or acute ischemia provoke profound changes in the passive electrical properties of cardiac muscle In particular electrotonic uncoupling of the myocytes disrupts the coordinated activation and repolarization of cardiac tissue The resulting compensatory changes in ionic currents decrease cardiac electrical stability increasing the risk for life threatening changes in the cardiac rhythm Thus the electrical properties of myocardial cells must be considered as a unit rather than in isolation It is the purpose of this Research Topic to evaluate the largely neglected relationship between changes in passive electrical properties of cardiac muscle and arrhythmia formation *Phagocytosis: Molecular Mechanisms and Physiological*
