Swinnen, 2015-07-30 After five years of debates consultations and negotiations the European institutions reached an agreement in 2013 on the Common Agricultural Policy CAP for the 2014 2020 period The outcome has major implications for the EU s budget and farmers incomes but also for Europe s environment its contribution to global climate change and to food security in the EU and in the world It was decided to spend more than 400 billion during the rest of the decade on the CAP The official claims are that the new CAP will take better account of society s expectations and lead to far reaching changes by making subsidies fairer and greener and making the CAP more efficient It is also asserted that the CAP will play a key part in achieving the overall objective of promoting smart sustainable and inclusive growth However there is significant scepticism about these claims and disappointment with the outcome of the decision making the first in which the European Parliament was involved under the co decision procedure In contrast to earlier reforms where more substantive changes were made to the CAP the factors that induced the policy discussions in 2008 13 and those that influenced the decision making did not reinforce each other On the contrary they sometimes counteracted one another yielding an imperfect storm as it were resulting in more status quo and fewer changes This book discusses the outcome of the decision making and the factors that influenced the policy choices and decisions It brings together contributions from leading academics from various disciplines and policy makers and key participants in the process from the European Commission and the European Parliament

Strategic Cyber Deterrence Scott Jasper, 2017-07-08 According to the FBI about 4000 ransomware attacks happen every day In the United States alone victims lost 209 million to ransomware in the first quarter of 2016 Even worse is the threat to critical infrastructure as seen by the malware infections at electrical distribution companies in Ukraine that caused outages to 225 000 customers in late 2015 Further recent reports on the Russian hacks into the Democratic National

Committee and subsequent release of emails in a coercive campaign to apparently influence the U S Presidential Election have brought national attention to the inadequacy of cyber deterrence The U S government seems incapable of creating an adequate strategy to alter the behavior of the wide variety of malicious actors seeking to inflict harm or damage through cyberspace This book offers a systematic analysis of the various existing strategic cyber deterrence options and introduces the alternative strategy of active cyber defense It examines the array of malicious actors operating in the domain their methods of attack and their motivations It also provides answers on what is being done and what could be done by the government and industry to convince malicious actors that their attacks will not succeed and that risk of repercussions exists Traditional deterrence strategies of retaliation denial and entanglement appear to lack the necessary conditions of capability credibly and communications due to these malicious actors advantages in cyberspace In response the book offers the option of adopting a strategy of active cyber defense that combines internal systemic resilience to halt cyber attack progress with external disruption capacities to thwart malicious actors objectives It shows how active cyber defense is technically capable and legally viable as an alternative strategy for the deterrence of cyber attacks

Power and Illicit Drugs in the Global South Maziyar Ghiabi, 2020-04-28 More than a hundred years have passed since the adoption of the first prohibitionist laws on drugs Increasingly the edifice of international drug control and laws is vacillating under pressures of reform Scholarship on drugs history and policy has had a tendency to look at the issue mostly in the Western hemisphere of the globe or to privilege Western narratives of drugs and drugs policy This volume instead turns this approach upside down and makes an intellectual attempt to redefine the subject of drugs in the Global South Opium heroin cannabis hashish methamphetamines and khat are among the drugs discussed in the contributions to the volume which spans from Sub Saharan Africa to Southeast Asia including the Middle East North Africa Latin America and the Indian Subcontinent The volume also makes a powerful case for an interdisciplinary approach to the study of drugs by juxtaposing the work of historians political scientists geographers anthropologists and criminologists Ultimately this edited volume is a rich and diverse collection of new case studies which opens up venues for further research This book was originally published as a special issue of Third World Quarterly

The Internal Impact and External Influence of the Greek Financial Crisis John Marangos, 2017-08-03 This contributed volume explores the political economy and socioeconomic aspects of the Greek Financial Crisis both within the country's borders and as part of the global economy With chapters authored by international experts this book examines and explicitly deals with specific and important issues that have been ignored by the dominant socioeconomic theory and practice which have largely focused on the causes and broad economic consequences of the crisis Discussions include the efficacy of new EU institutions created to address the crisis the rise of unregistered economic activity and comparisons with financial crises in countries beyond Europe This diverse collection argues that the Greek Financial Crisis was not just an economic crisis but a political and social crisis as well one with repercussions beyond Europe

construction of the EU's external frontiers Is the EU committed to promoting integration in a wider European space or is a fortress Europe emerging where the strengthening of internal cohesion is coupled with the militarisation of its external borders The book aims to problematize this question by showing how the EU's external policies are based on a mixture of openness and closure inclusion and exclusion cooperation and securitisation The European Neighbourhood Policy is a controversial strategy where regionalization and bordering homogenisations and differentiations centrifugal and centripetal forces proceed side by side in an explicit attempt to construct a selective mobile and fragmented border A specific focus is devoted to the diversity of geo strategies the EU is pursuing in its neighbouring countries and regions macro regional strategies and cross border cooperation initiatives as new scales of cooperation and the role of other global players **5**

Economic Sanctions in International Law and Practice Masahiko Asada, 2019-11-07 Providing perspectives from a

range of experts including international lawyers political scientists and practitioners this book assesses current theory and practice of economic sanctions discussing current legal and political challenges faced by the international community It examines both the implementation of sanctions by major powers the United States the European Union and Japan as well as assessing the impact of those sanctions through case studies of Russia Iran Syria and North Korea Balancing theoretical analysis of legal considerations with national and regional level empirical analysis it also includes coverage of sanctions issues by the UN Security Council and the EU as well as the extraterritorial application of sanctions A valuable reference for academics and practitioners *Economic Sanctions in International Law and Practice* will be useful to those working in the fields of international law diplomacy and international political economy Mandela's Kinsmen Timothy Gibbs, 2014

Mandela's Kinsmen is the first study of the fraught relationships between the ANC leadership and their relatives who ruled apartheid's foremost tribal Bantustan the Transkei In the early 20th century the chieftaincies had often been well springs of political leadership In the Transkei political leaders such as Mandela used regionally rooted clan schooling and professional connections to vault to leadership they crafted expansive nationalisms woven from these kin identities But from 1963 the apartheid government turned South Africa's chieftaincies into self governing tribal Bantustans in order to shatter African nationalism While historians often suggest that apartheid changed everything African elites being eclipsed by an era of mass township and trade union protest and the chieftaincies co-opted by the apartheid government there is another side to this story Drawing on newly discovered accounts and archives Gibbs reassesses the Bantustans and the changing politics of chieftaincy showing how local dissent within Transkei connected to wider political movements and ideologies Emphasizing the importance of elite politics he describes how the ANC in exile attempted to re-enter South Africa through the Bantustans drawing on kin networks This failed in KwaZulu but Transkei provided vital support after a coup in 1987 and the alliances forged were important during the apartheid endgame Finally in counterpoint to Africanist debates that focus on how South African insurgencies narrowed nationalist thought and practice he maintains ANC leaders calmed South Africa's conflicts of the early 1990s by espousing an inclusive nationalism that incorporated local identities and that Mandela's kinsmen still play a key role in state politics today Timothy Gibbs is a Lecturer in African History University College London Southern Africa South Africa Namibia Lesotho Swaziland Botswana Jacana
