Learning Style Perspectives Lynne Celli Sarasin, Lynne M. Celli, 1999 Every teacher wants to improve teaching effectiveness and a good place to begin is by understanding the various ways students perceive and process information Learning Style Perspectives addresses the learning needs of the students taking into consideration individual preferences for absorbing and retaining material in an auditory visual or tactile manner Lynne Celli Sarasin gives us an overview of major theorists and synthesizes those theories into an approach to teaching which is easily applied in any college or university classroom setting The characteristics of auditory visual and tactile learners are described along with appropriate teaching techniques student reactions and evaluation of each style of learning Includes easily referenced charts of descriptors teaching strategies and student behaviors From publisher's description *Learning Style Perspectives* Lynne M. Celli, Nicholas D. Young, 2014-06 Web-based Educational Systems and Learning Styles Abdulrahman Alghamdi, 2012-01-25 Most universities are now moving to online and distance learning systems to meet the needs of different types of learners 1 Indeed e learning is already being used by a number of universities 2 which offer online courses and degree programs The online and distance learning systems can be used either to replace face to face learning or to assist students with face to face learning Numerous different learning styles have been identified which take into account individual differences in the way people learn The learning styles theory implies that how much individuals learn has more to do with whether the educational experience is geared toward their particular style of learning than whether or not they are intelligent Individuals perceive and process information in very different ways therefore there is a necessity for a learning system to take into account as many details as possible in terms of the learning styles of the users 3 *Human Resource (Talent) Development* Ronald R. Sims, 2023-01-01 The rapidly transforming environment that we live in has made human resource development HRD all the more necessary for the success of today's organizations HRD initiatives help their organizations by developing employees who assist their organizations in not only surviving but thriving in our increasingly global world Today's best practice or benchmarked organizations and their HRD professionals continue to recognize the importance of employee learning knowledge skills and motivation to organizational success This recognition increasingly opens many doors as organizational leaders accept the fact that HRD initiatives can be used to ensure that organization members have what it takes to successfully meet the demands that confront them and their organizations This book takes the position that HRD can demonstrate how their initiatives help to develop a superior workforce so that the organization and its individual employees can accomplish their strategic and operational goals in service to their clients or customers This book is written with the belief that HRD professionals have many opportunities to learn change and find ways both in and outside of the workplace to contribute to the development of learning organizations as we move further into the 21st century A major point of this book is that HRD will continue to become more and more important to organizational success when one

considers the increased responsibilities HRD professionals have taken on during and post the COVID pandemic The primary audience for this book is practicing HRM and HRD professionals and other organizational leaders The book provides proven ideas important to demonstrating the value of HRD From a practical viewpoint it is based on actual experience a strong research base and accepted practices presented in an easy to read form A second target audience is students of HRD and HRM who are preparing for careers in this important field This book will help them develop a solid foundation to the study of HRD practices or initiatives that are key to HRD success regardless of the type of organization A third target audience is managers or leaders at all levels of an organization who are expected to take on a number of HRD responsibilities e g as trainers coaches mentors change agents and so on while regularly partnering with HRD professionals It offers these individuals a firsthand look at what they should expect of their HRD functions or areas and how they can effectively work with HRD professionals in their organizations to achieve the organizations strategic goals by getting the most out of its human people
