## Learning The Cardiovascular System Of The Cat:

Exploring Cats: Their Behaviors and Human-Cat Interactions Lynette Arnason Hart, Benjamin Hart, Emma Kathryn Grigg, Leslie Ann Lyons, Dennis Clair Turner, 2023-12-27 Cats exceed dogs in their numbers as companion animals in the U S and much of Europe despite them not filling working roles In the past their prowess as mousers on farms sometimes made them essential but these days many cats lead leisurely lives in people s homes What accounts for them becoming such appreciated family members What are their behaviors that are so enticing Exactly how do they respond to us When are they preferred companion animals more than dogs What do we know about cultural differences in views about cats Their growing popularity and the relative paucity of data about owned cats living in homes emphasizes the importance of monitoring their welfare The anthrozoological research literature on companion animals includes extensive studies of dogs while contributing relatively few close looks at the special behaviors and traits of domestic cats that make them so desirable as companions We know little about the dynamics of our interactions with cats and the attachment shared with them which may differ in some ways for those we have with dogs Nor have we identified the specific contexts where cats are particularly or uniquely compatible How does the type of attachment affect and shape the bond relationship between human and cat How are cats as emotional support animals for people with special needs especially autism What new information do we have about the cognitive abilities of domestic cats and how these abilities shape cats behavior and relationships with humans How do early life experiences of cats influence their behavior as adults or their successful integration into human households Do cats fit best in certain residential settings or with specific types or ages of people This Research Topic provides an opportunity to update our understanding on the special qualities and behaviors of cats and to scrutinize our mutual interactions with these companions
