Theory to Practice Sahbi Hidri, 2018-01-12 This book presents an overview of revisiting the assessment of language abilities

It also showcases how the measurement of such constructs can result in negative or positive washback and how outcomes might be conducive to repercussions that decide on the future of many stakeholders. The 23 chapters were selected among tens of chapters received from different contexts that addressed the issue of revisiting the assessment of language abilities such as Tunisia, Ukraine, Algeria, Russia, KSA, Sudan, Egypt, Canada, Kurdistan, UK, USA, Iran, Turkey, etc. These contexts have highlighted the necessity to revisit the different constructs which should be assessed with a clear and straightforward foundation on students' learning objectives and their actual language ability. To do so, most of the chapters present hands-on use of relevant statistical tests that might serve in revisiting the construct definition both theoretically and operationally. Perhaps the sole and intricate question that the authors of these contributions ask is what it means to revisit the assessment of the construct of individualized language ability and how. In addition, the book accentuates the momentousness and significance of reflecting on test fairness and validation as the mainspring and backbone for democratization of assessment. This book appeals to a broad readership such as English Language Teaching (ELT) practitioners, language teachers, students, testing organizations, policy makers, test designers, writers of test specifications, testing experts, researchers, program evaluators, especially in the Middle East and North Africa (MENA) as well as other international contexts. **Teaching**

Multiliteracies in World Language Education Yuri Kumagai, Ana López-Sánchez, Sujane Wu, 2015-10-05 Putting a multiliteracies framework at the center of the world language curriculum, this volume brings together college level curricular innovations and classroom projects that address differences in meaning and worldviews expressed in learners' primary and target languages. Offering a rich understanding of languages, genres and modalities as socioculturally situated semiotic systems, it advocates an effective pedagogy for developing learners' abilities to operate between languages. Chapters showcase curricula that draw on a multiliteracies framework and present various classroom projects that develop aspects of multiliteracies for language learners. A discussion of the theoretical background and historical development of the pedagogy of multiliteracies and its relevance to the field of world language education positions this book within the broader literature on foreign language education. As developments in globalization, accountability and austerity challenge contemporary academia and the current structure of world language programs, this book shows how the implementation of a multiliteracies based approach brings coherence to language programs and how the framework can help to accomplish the goals of higher education in general and of language education in particular.
