

Decorations

To make decorations a wide variety of stitches, braiding patterns, and fabric can be used depending on the type of decoration and the characteristics of the piece. Therefore, some decorations can have a purely esthetic purpose, creating finishes with bones and stitches, or made to be used as appliques. Others, however, can be used for structural purposes, that is, to join the pieces together. In this section we will show examples of how to make a stitch and a knot, explaining in detail the specific steps. There are many more techniques, but here we will cover the two most interesting ones as a starting point for those who wish to explore this discipline further.

Cross-stitch

This consists of crossing a leather lace forward and backward through the holes made in the piece. It can be used for purely decorative purposes, as a chevron to adorn or to decorate any piece, and it can also be used for strong horizontal stitches. To make this stitch, the space between the holes and the separation between the rows of holes must be in proportion to each other. In this case, the stitch is done with a 1/8 inch (3 mm) wide leather lace in holes 3/16 (4 mm) in diameter, with a 1/4 inch (7 mm) separation between them and placed in two rows, 1/2 inch (1.2 cm) apart. In this example we have used the stitch for making a joint, although the technique is the same for decorative purposes.

► 1. We begin by inserting the needle from the bottom of the piece through the first hole of the row on the right, leaving part of the lace hanging loose. The lace is crossed over to the second hole in the other row (the one to the left, through which it goes in, and then it comes out of the first hole from behind.

► 2. The lace is crossed over again on to the opposite row, the right one, entering through the third hole and coming out of the second one from behind.

► 3. It is crossed over to the opposite row again, introducing the needle through the third hole and pulling it out through the second one from behind.

► 4. It is crossed over again to the opposite row, on the right, and the needle inserted through the fourth hole, coming out of the third from behind. This process is repeated, crossing over to the opposite row and inserting through the empty hole located below each stitch from the front and coming out of the back through the upper hole where the previous stitch is located.

► 5. When the cross-stitch is finished, two rows of long, similar, and symmetrical stitches can be seen on the lower part (flesh side). The ends of the lace are secured as shown here, passing them through the first and last stitches. The excess lace is trimmed off and each end glued on to the leather piece with a drop of cyanoacrylate adhesive.

► 6. View of the piece joined together with cross-stitching.
