Ishwara Bhat, 2019-09-05 Legal research examines subject matter enshrouded in social circumstances in order to conceptualize theories and prepare a future course of action This dynamic inter disciplinary and labyrinthine character of legal research requires researchers to be fluid eclectic and analytical in their approach Idea and Methods of Legal Research unearths how the thinking process is to be streamlined in research how a theme is built on the basis of comprehensive and intensive study and the paths through which notions of objectivity feminism ethics and purposive character of knowledge are to be understood The book first explains the meaning evolution and scope of legal research and discusses objectivity and ethics in legal research It engages with the requirements advantages and limits of various doctrinal and non doctrinal methods and tools and the points to be considered in selecting a suitable method or combination of methods It highlights analytical historical philosophical comparative qualitative and quantitative methods of legal research The book then goes on to discuss the use of multi method legal research policy research action research and feminist legal research and finally reflects on research based critical legal writing as opposed to client related legal writing This book thus is a comprehensive answer to key questions one faces in legal research

Methodologies of Legal Research Mark Van Hoecke, 2011-02-28 Until quite recently questions about methodology in legal research have been largely confined to understanding the role of doctrinal research as a scholarly discipline In turn this has involved asking questions not only about coverage but fundamentally questions about the identity of the discipline Is it mainly descriptive hermeneutical or normative Should it also be explanatory Legal scholarship has been torn between on the one hand grasping the expanding reality of law and its context and on the other reducing this complex whole to manageable proportions The purely internal analysis of a legal system isolated from any societal context remains an option and is still seen in the approach of the French academy but as law aims at ordering society and influencing human behaviour this approach is felt by many scholars to be insufficient Consequently many attempts have been made to conceive legal research differently Social scientific and comparative approaches have proven fruitful However does the introduction of other approaches leave merely a residue of legal doctrine to which pockets of social sciences can be added or should legal doctrine be merged with the social sciences What would such a broad interdisciplinary field look like and what would its methods be This book is an attempt to answer some of these questions
