Faculty Of Economic And Management:

Calendar University of the Free State. Grima, Inna Romănova, Grațîela-Georgiana Noja, Tomasz Dorożyński, 2024-11-18 The chapters collected here examine the economic development main experiences lessons learned and the challenges and perspectives ahead of the new member states of the EU to identify the determinants of imbalances in the economic development of these countries *Global and Regional Economic Inequality* Stanisław Maciej Kot, Katarzyna Ostasiewicz, 2019-11-11 Global economic inequality has attracted the attention of researchers and policy makers for several years Globalization has raised questions about its impact on global inequality and poverty However the recent answers to such questions are ambiguous According to some researchers global inequality increases Other economists hold that inequality decreases One can also find the opinion that global inequality does not exhibit any visible increasing or decreasing trend One may ask the question what the reason of such variety of opinions about global inequality is The lack of countries statistical income data comparable across countries and years seems to be the main reason of controversial conjectures concerning global inequality and its evolution over time Global samples of individual income data on a worldwide scale would be ideal for this purpose However such micro data are currently available only for a limited number of countries and years In the databases which purport to collect income data on a worldwide scale only some summary statistics quantile income shares means Gini indices are presented However countries Gini indices cannot be used for the evaluation of global inequality since this measure of inequality is not decomposable Therefore the development of efficient methods of extracting micro data from available secondary statistics now seems to be the only way of overcoming the scarcity of national household surveys samples The recent ungrouping methods have several

shortcomings among them unknown statistical reliability and the limited coverage of countries are the most serious In this monograph a new method of retrieving the global sample of incomes is proposed This method based on the Sequential Probability Ratio Test generates random samples which reconstruct unavailable national samples with predetermined statistical reliability and numerical precision The application of this method brings empirical evidences which contradict the widespread opinion about rising global inequality in two recent decades *Economics, Management, & Econometrics* Ahmet Mete Çilingirtürk, Anne Albrychiewicz-Słocińska, Besim Bülent Bali, **Greening Our Economy for a Sustainable Future** Simon Grima, Kiran Sood, Ercan Ozen, Rebecca Emily Dalli Gonzi, 2024-10-17 Greening Our Economy for a Sustainable Future examines the green economy by balancing social needs the environment and the economy It argues that different economic models must be developed to address the environment caused by economic expansion The book not only looks at the opportunities of having a green economy but also goes into areas such as greenwashing social washing sustainability economics and more In addition it addresses how one can improve well being through a symbiotic relationship between economic growth and environmental stewardship Reviews literature and case studies that can be applied on a large scale on measures to change the way of economic development to implement a green economy theory Examines bottlenecks that occur when resource scarcity or poor quality makes investment more expensive Highlights opportunities for innovation spurred by policies and framework conditions that allow for new ways of addressing environmental problems

State-owned enterprises in Africa and the economics of public service delivery Fulufhelo G. Netswera, Omololu M. Fagbadebo, Nirmala Dorasamy, 2023-03-01 This book intends to provide a continuous assessment of the crisis in governance in Africa As it is there are huge deficits in the capacity of African states to harness vast human and material resources to promote good governance This manifests in pervasive corruption collapsed service delivery collapsed state owned enterprises eroded social trust capital flight escalating levels of poverty and wars human insecurity and stunted growth The public sector is the pulse of service delivery because the entire governance system revolves around the sourcing of materials and services mostly from the private sector in order to achieve its public policy intents The procurement process therefore ordinarily ought to yield positive economic outcomes and an efficiency driven system in favour of the government itself and its service recipients However this more often than not is not the case Despite its enormous wealth the African continent is in an economic quagmire a dilemma that requires multi facet research activities This is the motivation for this book
