Perry,2022-07-19 Recent years have seen an increase in the number of African Americans elected to political office in cities where the majority of their constituents are not black In the past the leadership of black politicians was characterized as either deracialized or racialized that is as either focusing on politics that transcend race or as making black issues central to their agenda Today many African American politicians elected to offices in non majority black cities are adopting a strategy that universalizes black interests as intrinsically relevant to the needs of their entire constituency In *Black Mayors White Majorities* Ravi K Perry explores the conditions in which black mayors of majority white cities are able to represent black interests and whether blacks historically high expectations for black mayors are being realized Perry uses Toledo and Dayton Ohio as case studies and his analysis draws on interviews with mayors and other city officials business leaders and heads of civic organizations in addition to official city and campaign documents and newspapers Perry also analyzes mayoral speeches the 2001 ward level election results and city demographics *Black Mayors White Majorities* encourages readers to think beyond the black white dyad and instead to envision policies that can serve constituencies with the greatest needs as well as the general public **The Healthcare Fix** Laurence J. Kotlikoff,2007-09-07 A simple straightforward and foolproof proposal for universal health insurance from a noted economist The shocking statistic is that forty seven million Americans have no health insurance When uninsured Americans go to the emergency room for treatment however they do receive care and a bill Many hospitals now require uninsured patients to put their treatment on a credit

card which can saddle a low income household with unpayably high balances that can lead to personal bankruptcy Why don't these people just buy health insurance Because the cost of coverage that doesn't come through an employer is more than many low and middle income households make in a year Meanwhile rising healthcare costs for employees are driving many businesses under As for government supplied health care ever higher costs and added benefits for example Part D Medicare's new prescription drug coverage make both Medicare and Medicaid impossible to sustain fiscally benefits grow faster than the national per capita income It's obvious the system is broken What can we do In The Healthcare Fix economist Laurence Kotlikoff proposes a simple straightforward approach to the problem that would create one system that works for everyone and secure America's fiscal and economic future Kotlikoff's proposed Medical Security System is not the socialized medicine so feared by Republicans and libertarians it's a plan for universal health insurance Because everyone would be insured it's also a plan for universal healthcare Participants including all who are currently uninsured all Medicaid and Medicare recipients and all with private or employer supplied insurance would receive annual vouchers for health insurance the amount of which would be based on their current medical condition Insurance companies would willingly accept people with health problems because their vouchers would be higher And the government could control costs by establishing the values of the vouchers so that benefit growth no longer outstrips growth of the nation's per capita income It's a single payer plan but a single payer for insurance The American healthcare industry would remain competitive innovative strong and private Kotlikoff's plan is strong medicine for America's healthcare crisis but brilliant in its simplicity Its provisions can fit on a postcard and Kotlikoff provides one ready to be copied and mailed to your representative in Congress
