

MATTER & ENERGY

MATTER & ENERGY Name: _____

Everything, absolutely everything that exists on Earth and in the entire universe is either **matter** or **energy**.

Matter is anything you can touch. It can be solid, liquid or gas, but it must take up space. Take note of some of the examples of matter below.

Matter has properties which can be measured:

- **Mass:** All matter has mass. Mass is the amount of "stuff" something has. Mass is more than a wish because it made it.
- **Volume:** All matter has volume. Volume is a measure of something taking up.
- **Shape:** Matter has shape. It can be measured and it takes.

Matter has other properties too. It can have color or it can be a temperature. It can have smells and tastes.

in the space below, list at least 10 more examples of matter. Is around you. Most everything you can see is matter!

MATTER & ENERGY Name: _____

Everything is not matter. It must be energy. Energy is defined as the ability to do work. Energy does not take up space. You can't touch energy, but you can feel it. Take a look at some examples of energy below.

Energy can be used but it sometimes used up. That's because energy cannot be created or destroyed, it just changes in the form of **Conservation of Energy**. When energy is used for one thing, it doesn't disappear. Instead, it is transferred somewhere else.

For example, imagine yourself kicking a ball. When you kick the ball, energy is transferred from your leg to the ball. If you play for a while, you might be a bit tired. That's all the energy you gave up. The ball uses your energy to fly away. It might transfer the energy again if it bounces into a wall. That ball will also show you a great energy, and the wall might use the energy to vibrate.

Energy can also be stored. Batteries store energy. Food also stores energy! That's why we eat it. Objects can store energy just because of their location too. Consider the car that is stuck at the top of the mountain. It has more potential to fall (or move) than it has in a valley.

List 10 ways you can energy in the space below.
