

Cell Transport Study Guide

11. What does diffusion mean? Molecules move randomly across and collide with each other.
12. What is the movement from an area of high concentration to an area of low concentration? Diffusion
13. Give the type of passive transport that requires input of energy from the cell. Active Transport
14. What happens to cells placed in a hypertonic solution? They shrivel due to losing water by osmosis
15. What parts will be near water because they are hydrophilic? Part labeled A. Polar heads of the phospholipids

16. What parts will reject water because they are hydrophobic? Part B: Non Polar Tails of phospholipids
 17. When the concentrations across a cell membrane are the same... Some Chemicals move? No. Because the cell is at equilibrium or a state of homeostasis.
 18. Are cholesterol and phospholipids hydrophilic or hydrophobic? Hydrophobic. Both are rejected by water.
 19. What is osmosis? The diffusion of water.
 20. What happens to a cell that is placed in a hypotonic solution? It swells up.
 21. What structure serves as the cell's boundary from its environment and regulates what materials enter and leave the cell? Cell Membrane
 22. Large molecules such as hormones are released or captured from a cell during? Transport
 23. What happens if too much water diffuses into a cell? It may burst.
 24. What is an example of passive transport? Diffusion.
 25. What is passive transport? Cell transport that requires no energy from the cell
 26. What is the movement of molecules down a concentration gradient across the cell membrane? Diffusion
- What is the difference in the concentration of dissolved particles from one location to another is called?

The Complementary Therapist's Guide to Conventional Medicine E-Book Clare Stephenson, 2011-07-26 The Complementary Therapist's Guide to Conventional Medicine is a unique textbook for students and practitioners of complementary medicine offering a systematic comparative approach to Western and Eastern medicine Practitioners of complementary medicine increasingly find themselves working alongside conventionally trained doctors and nurses and it is vital for them to develop a core understanding of conventional medical language and philosophy The book is designed as a guide to understanding conventional medical diagnoses symptoms and treatments whilst also encouraging the reader to reflect on and translate how these diagnoses may be interpreted from a more holistic medical perspective Throughout the text the practitioner student is encouraged to see that conventional and more holistic interpretations are not necessarily contradictory but instead are simply two different approaches to interpreting the same truth that truth being the patient's symptoms After introductory sections on physiology pathology and pharmacology there follow sections devoted to each of the physiological systems of the

body In these the physiology of each system is explored together with the medical investigation symptoms and treatments of the important diseases which might affect that system As each disease is described the reader is encouraged to consider the corresponding Chinese medical perspective The textbook concludes with chapters relating specifically to dealing with patients in practice In particular these focus on warning signs of serious disease supporting patients on medication and ethical issues which may arise from management of patients which is shared with conventional practitioners The book also offers a detailed summary of Red Flag symptoms which are those which should be referred for Western medical investigation or emergency medical treatment and also a guide to how patients can be safely supported in withdrawing from conventional medication when this is clinically appropriate Those wishing to use the text for systematic study can make use of the question and problem solving approach offered on the accompanying CD to which references to self study exercises appear at regular stages throughout the book This means that the text can be easily adapted to form the basis of a study course in clinical medicine for students of complementary medicine In addition to the self testing questions and answers the supporting CD also contains checklists for revision and full colour illustrations

ABOUT THE AUTHOR Clare Stephenson is a qualified medical practitioner who worked in hospital medicine general practice and public health medicine for a number of years before training in Traditional Chinese Medicine TCM and acupuncture Over the course of a decade she developed and taught an undergraduate course for students of Chinese medicine on Western medicine and how it relates to TCM She is particularly committed to encouraging communication and understanding between practitioners of different health disciplines She currently works as a GP in Oxfordshire Approx 734 pages
