Depression and the Divine David C. Wilson, 2018-12-21. David Wilson's initial research into the phenomenon of prophecy in the Hebrew Bible suggested that many of the passages featuring prophets and hitherto considered to be bizarre myths or much edited collections of traditions were in fact sequences of dreams. Moreover, it was possible to compare the structure of these sequences with the structure of a night's sleep hypnogram as revealed by modern sleep research to demonstrate that the sleeper was depressed. This characteristic depressive sleep architecture was then used to show that three characters in particular, Elijah, Jonah, and Adam, compared in the New Testament with Jesus, were all in fact depressed. Quite naturally, this raised further questions concerning the nature of Jesus himself: Was he merely a prophet? If he wasn't, how did he differ? If he was depressed, how was he able to function and succeed in his mission when Elijah and Jonah clearly had such great difficulties? These and other questions are raised throughout this book, and many of them are not new, but they are however changed forever when asked against a contextual background of altered states of consciousness (ASCs) and dreamform in particular.

Animal Suffering Marian Dawkins,2012-12-06 I wrote this book because I believe that the welfare of animals is a very important subject but one about which there is a of confusion and muddled thinking I wanted to great deal write a book which straightened out some of the confusion by looking in detail at one particular problem how to recognize animal suffering The book is written for anyone interested in animals and the controversies over how human beings should treat them I have tried to convince people who might otherwise feel that science had only a rather sinister connection with animal welfare that the scientific study of animal suffering has in fact a major and positive contribution to make It can give us an insight into what animals experience and this in tum may help us to alleviate their suffering At the same time I have tried to write a book that will be of at least some use to scientists The chapters which follow pro vide an outline of the biological approach to animal welfare I have also attempted to show sceptics that it is possible to study animal suffering without sacrificing standards of scien tific procedure Perhaps some may even come to share my belief that the study of the subjective

experiences of animals is one of the most fascinating areas in the whole of biology as well as being of great practical and ethical importance
