Closed book examination

This examination question paper remains the property of the University of South Africa and may not be removed from the examination venue

This paper consists of 3 pages

Answer any FOUR of the following six questions. Questions carry equal marks

The marks also indicate the approximate amount of time you can spend on each question

STUDENTS ARE ALLOWED TO USE NON PROGRAMMABLE CALCULATORS.

As in the prescribed material, we use the comma (,) to separate thousands and the full stop (.) as a decimal point

QUESTION 1

- (a) What does it mean to say that a person is a risk lover or is risk averse? (4)
(b) Suppose that two projects have the same four payoffs but the probability associated with each payoff differs, as illustrated below

Payoff	Project A	Project B
R100	0.3	0.2
R150	0.2	?
R50	?	0.1
R200	0.1	0.2

- (i) What is the probability of getting a payoff of R50 under project A and a payoff of R150 under project B? [Fill in the missing probability values] (2)
(ii) Find the expected return and standard deviation of each project (14)
(iii) If Samson's utility function is $U = 2I$, where I denotes the payoff, which investment will Samson choose? (5)

Radiation-induced and oxidative DNA damages Antonio Monari, Elise Dumont, Chrysostomos Chatgililoglu, 2015-10-02
DNA stores and passes the genetic information of almost all living organisms. Its molecular structure and their intramolecular interactions are particularly suitable to maximize stability against oxidative stress and UV light absorption. Yet the protection and repair strategies are still error prone. DNA lesions are produced including the most complex and highly mutagenic ones. An important threat to DNA stability comes from photosensitization, i.e. from the dramatic multiplication of radiation induced defects mediated by the presence of organic or organometallic dyes compared to the direct exposure to UVA radiation. Moreover the photo induced production of singlet oxygen generates an extremely high oxidative stress on DNA that in vivo normally results in extended cellular apoptosis. Elucidating the processes leading to DNA damages from the production of a simple radical entity to deleterious lesions as well as the opportunities of repair by devoted enzymes is a cornerstone towards the development of more efficient protection strategies. Sensitization and selective production of DNA lesions can also be exploited to induce the selective apoptosis of cancer cells upon exposition to radiation or to oxidative stress for instance in the field of photodynamic therapy. The importance and relevance of the field is witnessed by the impressive amount of high level papers dealing with this complex subject and notably tackling the structural elucidation of DNA and DNA drug adducts, the mechanisms of formation of DNA lesions including the precise detection of the final lesion products as well as the influence of the lesions on the DNA stability and dynamics and the consequences on the ease of repair. Due to the complexity of the field lying at the frontiers between chemistry, physics and biology, multidisciplinary strategies allying modeling and experience are needed. This topic aims at giving an extended overview of the current research in the domain with fundamental contribution from the leading groups in the field of DNA reactivity, structural characterization, photo chemistry and photo physics as well as repair mechanism. It will therefore be a fundamental guide for scientists wanting to address the field of DNA lesion and repair but also more generally for researchers working in rational drug design or in the development of biomarkers and medical imaging techniques.

Assisted Reproductive Technologies in the Global South and North
Virginie Rozée, Sayeed Unisa, 2016-07-15
Assisted Reproductive Technologies in the Global South and North critically analyses the political and social frameworks of Assisted Reproductive Technology (ART) and its impact in different countries. In the context of a worldwide social pressure to conceive, particularly for women, this collection explores the effect of the development of ARTs, growing globalisation and reproductive medicalization on global societies. Providing an overview of the issues surrounding ART both in the Global South and North, this book analyses ART inequalities, commonalities and specificities in various countries, regions and on the transnational scene. From a multidisciplinary perspective and drawing on multisite studies, it highlights some new issues relating to ART, e.g. egg freezing, surrogacy and discusses some older issues regarding infertility and its medical treatment, e.g. in vitro fertilisation, childless stigmatisation and access to treatment. This

book aims to redress the balance between what is known about Assisted Reproductive Technologies in the Global North and how the issue is investigated in the Global South It aims to draw out the global similarities in the challenges that ARTs bring between these different areas of the world It will appeal to scholars and students in the social sciences medicine public health health policy women s and gender studies and demography *The Statesman's Yearbook 2016* Nick Heath-Brown,2017-02-07 Now in its 152nd edition The Statesman s Yearbook continues to be the reference work of choice for accurate and reliable information on every country in the world Covering political economic social and cultural aspects the Yearbook is also available online for subscribing institutions www.statesmansyearbook.com ICIE 2015 3rd International Conference on Innovation and Entrepreneurship Deresh Ramjugernath,2015-02-24 These proceedings represent the work of researchers participating in the 3rd International Conference on Innovation and Entrepreneurship ICIE 2015 which is being co hosted by The University of KwaZulu Natal Durban and the Ethekwini Municipality Durban South Africa on the 19 20 March 2015 The ICIE Conference constitutes a valuable platform for individuals to present their research findings display their work in progress and discuss conceptual advances in many different branches of innovation and entrepreneurship in business and management At the same time it provides an important opportunity for researchers and managers to come together with peers share knowledge and exchange ideas ICIE builds on the now well established European Conference on Innovation and Entrepreneurship and allows universities outside the European Boundaries the opportunity to host an academic conference on these important topics In addition to the presentations of research the conference will feature a knowledge cafe led by Dr Shawren Singh looking at this topic How can academics focus research efforts to better serve the business and public sector communities The second day will open with a panel discussion looking at Smart cities Opportunities for Entrepreneurship and Economic growth Following an initial submission of 85 abstracts that have undergone a double blind peer review process 26 research papers 3 PhD research papers 2 work in progress papers are published in these Conference Proceedings representing research results from the Czech Republic Denmark Italy Kazakhstan Kenya Lithuania Nigeria Poland Saudi Arabia South Africa Sweden The Netherlands UK USA and Zambia *The High-risk Surgical Patient* Paolo Aseni,Antonino Massimiliano Grande,Ari Leppäniemi,Osvaldo Chiara,2023-03-07 It is well known that certain diseases and patient conditions are associated with increased perioperative risk The aim of this book is to define and identify the clinical factors that warrant a broader and more detailed assessment of pre operative surgical risk in difficult and unusual clinical settings One of the sections is dedicated to the main pathway of peri and post surgical critical care based on the patient specific deterioration risk and associated diseases here a panel of selected experts describes the correct patient oriented pathways for complex or unscheduled surgical operations in order to reduce the operative risk In addition the book describes the latest trends in minimally invasive surgical techniques that are associated with peri and post operative risk reduction and provides an overview of recent advances in surgical simulation focusing on perspectives in surgical research to

Human Resources for the Non-HR Manager Carol T. Kulik, Elissa L. Perry, 2023-05-02 Human Resources for the Non HR Manager gives every manager regardless of their functional role access to cutting edge research and evidence based recommendations so they can approach their people management responsibilities with confidence Day to day people management is increasingly the responsibility of front line managers not HR professionals But managers are often poorly prepared for these responsibilities they receive little training and sometimes have little interest in HR People management is never easy and it is particularly challenging in COVID 19 s next normal workplace where managers must engage diverse employees across a wide range of working arrangements This book focuses on the special relationship that line managers have with their employees and describes managers responsibilities across the entire employee lifecycle from front end recruiting and hiring through to long term retention The content is grounded in rigorous academic research but the book s conversational tone conveys basic principles without technical jargon Each chapter includes Manager s Checkpoints to help readers apply the material to their own workplace and Manager s Knots that address gray areas inherent in people management The book is designed for any reader currently working as a line manager or aspiring to a managerial role who wants to improve their people management skills Combined with a complete instructor package the book provides different types of activities to accompany each chapter Some Assembly Required In the News and Undercover Manager The activities can be found in the Instructor Resources Download Hub and are designed to align with student cohorts with varying levels of experience

Contested Properties Britta Rutert, 2020-02-03 This book deals with the

values of medicinal plants and associated knowledge s in the field of bioprospecting in post apartheid South Africa
Bioprospecting the use of genetic or biological resources for commercial purposes is a profit oriented enterprise facing new challenges with the rise of human rights and biodiversity politics This new situation has led to claims for political leverage made by indigenous communities as well as to claims for national and local cultural identity and heritage The picture presented here contributes to the widely discussed yet so far unresolved question of how to appropriately share benefits and how to protect indigenous knowledge in this field

Culture and Rural-Urban Revitalisation in South Africa

Mziwoxolo Sirayi,Modimowabarwa Kanyane,Giulio Verdini,2021-06-14 This book captures ground breaking attempts to utilise culture in territorial development and regeneration processes in the context of South Africa and our new normal brought by COVID 19 the fourth industrial revolution and climate change the world over The importance of culture in rural urban revitalisation has been underestimated in South Africa and the African continent at large Despite some cultural initiatives that are still at developmental stages in big cities such as Johannesburg eThekweni and Cape Town there is concern about the absence of sustainable policies and plans to support culture creativity and indigenous knowledge at national and municipal levels Showcasing alternative strategies for making culture central to development this book discusses opportunities to shift culture and indigenous knowledge from the peripheries and place them at the epicentre of sustainable development and the mainstream of cultural planning which can then be applied in the contexts of Africa and the Global South Governmental institutions research councils civil society organisations private sector and higher education institutions come together in a joint effort to explain the nexus between culture economic development rural urban linkages grassroots and technological innovations Culture and Rural Urban Revitalization in South Africa is an ideal read for those interested in rural and urban planning cultural policy indigenous knowledge and smart rural village model

Practical Approaches to Causal Relationship Exploration Jiuyong Li,Lin Liu,Thuc Duy Le,2015-03-02 This brief presents four practical methods to effectively explore causal relationships which are often used for explanation prediction and decision making in medicine epidemiology biology economics physics and social sciences The first two methods apply conditional independence tests for causal discovery The last two methods employ association rule mining for efficient causal hypothesis generation and a partial association test and retrospective cohort study for validating the hypotheses All four methods are innovative and effective in identifying potential causal relationships around a given target and each has its own strength and weakness For each method a software tool is provided along with examples demonstrating its use Practical Approaches to Causal Relationship Exploration is designed for researchers and practitioners working in the areas of artificial intelligence machine learning data mining and biomedical research The material also benefits advanced students interested in causal relationship discovery
