grounded in contemporary behavioral science theory Beginning with the assertion that equality of educational opportunity depends on access to experiences that are sufficiently appropriate and rich to enable the achievement of diverse human potentials she provides a comprehensive school design for intervention that demonstrates how to achieve it Grounded in recent advances in learning science McCallister asserts three necessary conditions for learning the need for learners to have access to diverse rich environmental experiences the need for them to enjoy fundamental freedom and autonomy to direct their own learning and access to full and free forms of association In her model these conditions provide what is necessary for learners to coordinate their minds with others to develop their identities personalities and talents These conditions are animated in concrete procedures that can be adapted to a wide variety of populations in formal informal and remote educational settings The procedures take the form of rules that learners comply with in the exercise of their freedom When they are followed the rules provide a grammar for the social norms that govern the moral worlds of learners and compel them to flourish Tested over two decades in her work as a teacher scholar and school reformer in more than 20 NYC public schools the McCallister Method has delivered an innovative and disruptive approach to schooling that has proven successful in finally transforming low performing industrial schools into 21st century learning organizations Online support material includes assessments records surveys and more to be used in school design and classroom settings

Official Florida Statutes Florida,2014 *How To Do Politics With Art* Violaine Roussel,Anurima Banerji,2016-10-26 A major issue in the relation of art to the rest of society is the question of how art penetrates politics From the perspective of most art scholars this is a question of aesthetics whether politics necessarily pollutes and debases the quality of the arts From the perspective of social science it has been primarily a question of meaning how political messages are conveyed through artistic media Recent work has begun to broaden the study of the arts and politics beyond semiosis and content focus Several strands of scholarship are converging around the general issue of the social relationships within which art takes political form that is how art and artists do politics This perspective of doing moves analysis beyond addressing the meaning of culture to focus on the ways that art is embedded in and intervenes in social relationships activities and institutions This volume brings together an interdisciplinary group of scholars from France and the United States to investigate these directions and themes by exploring the question of how to do politics with art from a comparative standpoint putting sociological approaches in conversation with other disciplinary prisms It will be of interest to scholars of social movements and politicization the sociology of art art history and aesthetics Toxic Sexual Politics Melina Packer,2025-01-28 A bold expos of how the very foundation of toxicology has been contaminated by sexist and racist ideologies The first critical understanding of the field of toxicology from a feminist and antiracist perspective Toxic Sexual Politics asserts that the science of toxicants must be held accountable for the uneven distribution of toxic pollution along racial and sexual lines Drawing upon in depth interviews and extensive ethnographic and archival research including participant observations in toxicology classrooms conferences and laboratories Melina Packer urges environmental health advocates to place toxicant science within its masculinist militarist and eugenicist history Toxic Sexual Politics shows how the founding fathers of U S toxicology were ideologically aligned with the chemical industry inventing a science that could

make chemicals safe as opposed to one that could adequately protect planetary health from toxicants hazards While many toxicologists today are critical of the chemical industry they continue to rely on the highly limited tools of toxicology as accurate measures of toxicity as do government regulators the courts and environmental advocates Unlike most critiques of the chemical industry and narratives of environmental health movements Toxic Sexual Politics refuses to take the science at face value By focusing on the sexist racist and ableist biases reinforced by toxicology Packer powerfully argues that this scientific discipline reproduces the very same white supremacist and heterosexist logics that generated environmental injustices in the first place The field of toxicology can explicitly confront chemical corporate power by building from queer feminist anti ableist and antiracist movements for environmental and reproductive justice

Europe's Justice Deficit?

Dimitry Kochenov,Gráinne de Búrca,Andrew Williams,2015-04-30 The gradual legal and political evolution of the European Union has not thus far been accompanied by the articulation or embrace of any substantive ideal of justice going beyond the founders intent or the economic objectives of the market integration project This absence arguably compromises the foundations of the EU legal and political system since the relationship between law and justice a crucial question within any constitutional system remains largely unaddressed This edited volume brings together a number of concise contributions by leading academics and young scholars whose work addresses both legal and philosophical aspects of justice in the European context The aim of the volume is to appraise the existence and nature of this deficit its implications for Europe s future and to begin a critical discussion about how it might be addressed There have been many accounts of the EU as a story of constitutional evolution and a system of transnational governance but few which pay sustained attention to the implications for justice The EU today has moved beyond its initial and primary emphasis on the establishment of an Internal Market as the growing importance of EU citizenship and social rights suggests Yet most legal analyses of the EU treaties and of EU case law remain premised broadly on the assumption that EU law still largely serves the purpose of perfecting what is fundamentally a system of economic integration The place to be occupied by the underlying substantive ideal of justice remains significantly underspecified or even vacant creating a tension between the market oriented foundation of the Union and the contemporary essence of its constitutional system The relationship of law to justice is a core dimension of constitutional systems around the world and the EU is arguably no different in this respect The critical assessment of justice in the EU provided by the contributions to this book will help to create a fuller picture of the justice deficit in the EU and at the same time open up an important new avenue of legal research of immediate importance
