Jasper Jones - Themes, Characterisation, and essay writing.

Themes

What are the themes in Jasper Jones?

Jasper Jones starts with a 13-year-old boy called Charlie Bucktin in his sleepout room in a fictional town called Corrigan in Western Australia in 1965(can be used in intro).

Charlie is reading in the sleepout when Jasper Jones, who is the local outcast primarily due to the racism of the town, comes tapping on his window and asks for his help. This kicks off a whodunit story exploring racism in small-town Australia.

Jasper Jones is essentially a theme = coming-of-age (Bildungsroman) =Genre (mention in intro) **narrative.** Through this framework, we're encouraged to look at that point where, as someone who is still growing up, you can choose to start asking those really hard life questions. You find yourself taking a fresh look at the world around you, seeing how things are and how they should be. **Asking those questions can be really uncomfortable and can make you feel insecure as you start questioning the whole framework of society in Australia.**

Craig Silvey, the writer of Jasper Jones, has this really great quote that basically says we can all become adults, but not all of us will grow up. To me, growing up means that you ask those tricky questions and have a look at the way the world around you really is, as opposed to sticking your head in the sand or living in a kind of fantasy world.

(Author's purpose)

Craig extends these ideas to reflect on Australia as a nation. **The 1960s, when the story is set, was a point where we had all these liberation movements** and perhaps thought we had grown up. But he's asking, 'have we just become adults?' Because we have a lot further to go before we truly grow up, even today.

Racism & ignorance

In 1960s Australia, non-white people were often subject to overt racism and this is clearly demonstrated in Jasper Jones. The Lu family and Jasper Jones are all subject to taunts, and even physical violence, because of their race. Both Jasper and Jeffrey are able to 'earn' the grudging respect of townsfolk because of their sporting abilities (Jasper in football, as briefly mentioned by Charlie, and Jeffrey in cricket). But this is a very shallow kind of respect, often quickly forgotten - both Jasper and Jeffrey continue to be called names and face discrimination - much like some of Australia's current Aboriginal sporting heroes!

The play suggests that racism is often paired with ignorance and a lack of understanding. Characters who seek knowledge and understanding, like Charlie and Mr Bucktin, are less likely to act in a discriminatory way towards others than most of the townsfolk. Many of the townsfolk have made assumptions about who Jasper and the Lu family are based on their

Final Solutions Benjamin A. Valentino, 2013-01-19 Benjamin A. Valentino finds that ethnic hatreds or discrimination undemocratic systems of government and dysfunctions in society play a much smaller role in mass killing and genocide than is commonly assumed. He shows that the impetus for mass killing usually originates from a relatively small group of powerful leaders and is often carried out without the active support of broader society. Mass killing in his view is a brutal political or military strategy designed to accomplish leaders' most important objectives: counter threats to their power and solve their most difficult problems. In order to capture the full scope of mass killing during the twentieth century, Valentino does not limit his analysis to violence directed against ethnic groups or to the attempt to destroy victim groups as such as do most previous studies of genocide. Rather, he defines mass killing broadly as the intentional killing of a massive number of noncombatants using the criteria of 50,000 or more deaths within five years as a quantitative standard. *Final Solutions* focuses on three types of mass killing: communist mass killings like the ones carried out in the Soviet Union, China, and Cambodia; ethnic genocides as in Armenia, Nazi Germany, and Rwanda; and counter guerrilla campaigns including the brutal civil war in Guatemala and the Soviet occupation of Afghanistan. Valentino closes the book by arguing that attempts to prevent mass killing should focus on disarming and removing from power the leaders and small groups responsible for instigating and organizing the killing.

During the past decade, members of the Cognition and Technology Group at Vanderbilt University have worked with hundreds of teachers and thousands of students throughout North America in the context of the Adventures of Jasper Woodbury problem-solving series. 12 videodisc-based adventures plus video-based analogs, extensions, and teaching tips designed to improve the mathematical thinking of students from grades 5 and up and to help them make connections to other disciplines such as science, history, and social studies. The experience of developing the Jasper series, testing it in classrooms, and re-designing it based on feedback provided The Cognition and Technology Group at Vanderbilt with extraordinarily rich opportunities to learn from teachers, students, parents, administrators, and other community members. This book was written for two reasons. First, it helped the authors to organize the thoughts and experiences of over 70 members of the Learning Technology Center who worked on the Jasper project and to collaboratively reflect on their experiences and relate them to the broader literature in cognition and instruction. Second, this book gives others a chance to learn from the experiences of the Cognition and Technology Group at Vanderbilt. The book is anchored around their experiences with Jasper, but the issues explored are relevant to any attempt to improve educational practice. This book tells a coherent story that helps readers explore issues of curriculum, instruction, assessment, and teacher learning, professional development within a single context: Jasper, and how all these topics are interrelated. It also helps readers see the relevance of research programs for improving

educational practice Throughout the need for maintaining a balance of laboratory and classroom research is emphasized
