

HOT PARTS

⚠ WARNING

Hot coolant and steam. Can cause severe injury or death. Before removing pressure cap stop generator, allow to cool and loosen pressure cap to relieve pressure.

⚠ WARNING

Hot engine and exhaust system. Can cause severe injury or death. Do not work on generator set until unit is allowed to cool.

Hot coolant can cause severe injury or death. Allow engine to cool and release pressure from cooling system before opening pressure cap. To release pressure, cover the pressure cap with a thick cloth then turn it slowly counterclockwise to the first stop. After pressure has been completely released and the engine has cooled, remove cap. If generator set is equipped with a coolant recovery tank, check coolant level at tank.

Hot parts can cause severe injury or death. Do not touch hot engine parts. An engine gets hot while running and exhaust system components get extremely hot.

FUEL SYSTEM

⚠ WARNING

Explosion. Gasoline vapors can cause explosion and severe injury or death. Before starting generator set, operate blower 4 minutes and check engine compartment for gasoline vapors.

	
⚠ WARNING	
Explosive fuel vapors. Can cause severe injury or death. Use extreme care when handling, storing, and using fuels.	

Explosive fuel vapors can cause severe injury or death. Fuel leakage can cause an explosion. Do not modify the tank or propulsion engine fuel system. Craft must be equipped with a tank allowing one of the two pickup arrangements described. Tank and installation must conform to U.S.C.G. Regulations.

Explosive fuel vapors can cause severe injury or death. Fuel leakage can cause an explosion. To prevent fuel leakage, use pipe sealant on all threaded fittings. Pipe sealant must be suitable for use in marine applications having oil and gasoline environments.

Explosive fuel vapors can cause severe injury or death. Gasoline vapors can explode and can cause death or severe injury. USCG Regulation 33CFR183 requires all electrical devices (ship-to-shore transfer switch, remote start panel, etc.) to be "ignition protected" when used in a gasoline (gaseous)-fueled environment. These electrical devices are not "ignition protected" and are not certified to operate in a gasoline (gaseous)-fueled environment such as engine room or near fuel tanks. Acceptable locations would be wheelhouse or other living areas sheltered from rain and water splash.
