Older Adult Care and Health Service Management: A Focus on the Asia-Pacific Region Madhan
Balasubramanian, Angie Shafei, Zhanming Liang, 2024-02-14 Population aging is a consistent global demographic trend The
growth in both the size and proportion of older adults has threatened the sustainability of health systems in meeting
healthcare needs of the population Countries in the Asia Pacific Region may face even more complex health system
challenges due to the diversity in culture management and leadership styles composition of health service provision
investment in research infrastructure and innovation adaptation data availability and gaps in information technology The
Asia Pacific is home to more than half of the world's population and comprises countries across five Asia Pacific subregions
East and North East Asia North and Central Asia Pacific South East Asia South and South West Asia The economies are
diverse including six high income countries such as Australia Brunei Japan New Zealand South Korea and Singapore low
income countries Nepal and North Korea and middle income countries The region also includes some of the fastest growing
economies in the world including China India Malaysia Thailand Indonesia and the Philippines **Transesophageal**
Echocardiography for Pediatric and Congenital Heart Disease Pierre C. Wong, Wanda C. Miller-Hance, 2021-07-17 This
extensively revised textbook reviews the use of transesophageal echocardiography TEE in pediatric and young adult patients
with cardiac disease It reviews how TEE has made a vital contribution to these patients successful and continually improving
clinical outcomes enabling them to live well into adulthood The book details the evolving technology and applications of TEE
including three dimensional TEE describing how this imaging approach remains at the forefront of clinical practice for
pediatric patients and those with congenital heart disease CHD Transesophageal Echocardiography for Pediatric and
Congenital Heart Disease represents a unique contribution as the only contemporary text to focus exclusively on the clinical
application of TEE in children and all patients with CHD Written by numerous prominent specialists in the field it presents a
comprehensive modern and integrated review of the subject Specific chapter topics include the physics and instrumentation
of TEE structural and functional evaluation and specialized aspects of the examination with emphasis on the technical
considerations pertinent to both pediatric and adult patients with a variety of congenital and acquired cardiovascular
pathologies Consequently it serves as a comprehensive reference for the TEE evaluation of CHD utilizing the segmental

approach to diagnosis and discussing the TEE evaluation of the many anomalies encompassing the CHD spectrum In addition numerous other relevant topics are discussed including application of TEE for perioperative and interventional settings The book is richly illustrated with many chapters supplemented by illustrative case studies and accompanying videos A specific section with multiple choice questions and answers is provided at the end of each chapter to reinforce key concepts This textbook therefore provides an invaluable and indispensable resource for all trainees and practitioners using TEE in the management of CHD and pediatric patients
