Ocean Bestiary Richard J. King,2023-05-26 A delightful A to Z menagerie of the sea whimsically illustrated authoritative and thought provoking For millennia we have taken to the waves And yet for humans the ocean remains our planet's most inaccessible region the place about which we know the least From A to Z abalone to zooplankton and through both text and original illustrations Ocean Bestiary is a celebration of our ongoing quest to know the sea and its creatures Focusing on individual species or groups of animals Richard J King embarks upon a global tour of ocean wildlife including beluga whales flying fish green turtles mako sharks noddies right whales sea cows as well as sea lions sea otters and sea pickles skipjack tuna swordfish tropicbirds walrus and yellow bellied sea snakes But more than this King connects the natural history of ocean animals to the experiences of people out at sea and along the world's coastlines From firsthand accounts passed down by the earliest Polynesian navigators to observations from Wampanoag clamshell artists African American whalers Korean female divers or haenyeo and today's pilots of deep sea submersibles and even to imaginary sea expeditions launched through poems novels and paintings Ocean Bestiary weaves together a diverse array of human voices underrepresented in

environmental history to tell the larger story of our relationship with the sea Sometimes funny sometimes alarming but always compelling King s vignettes reveal both how our perceptions of the sea have changed for the better and how far we still have to go on our voyage *Sea Drift* Peter Joseph Capelotti,2001 Heyerdahl s radical thesis of a prehistoric world where ancient mariners traveled between continents on ocean currents electrified the postwar world His *Kon Tiki Across the Pacific by Raft* sold twenty million copies in sixty five languages *The Kon-Tiki expedition* Thor Heyerdahl,1975

Crimson Horizon: The Mysterious Sea Kings Of The Pacific Brien Foerster,2012-11-30 The people of the Pacific known by most as Polynesians remain a mystery to scholars and the public alike as to their origins While most academics in the fields of archaeology and anthropology strongly insist that they exclusively came from 121 P a g e south east Asia other researchers and the oral traditions of the people themselves often differ with this opinion The presence of red hair called Ehu in Hawaii and Uru Kehu in some of the ancient and present populations suggest connections in the distant past with sea farers from coastal Peru especially the Paracas to account for this The famous explorer Thor Heyerdahl was insistent that there were ancient connections between Peru and the Pacific Islands and this book attempts to solve this riddle without delving into Celtic or other possible European ancestry Come explore the possibilities through science wind directions sea currents sculpture and oral traditions **Routes and Roots** Elizabeth DeLoughrey,2009-12-31 Elizabeth DeLoughrey invokes the cyclical model of the continual movement and rhythm of the ocean tidalectics to destabilize the national ethnic and even regional frameworks that have been the mainstays of literary study The result is a privileging of alter native epistemologies whereby island cultures are positioned where they should have been all along at the forefront of the world historical process of transoceanic migration and landfall The research determination and intellectual dexterity that infuse this nuanced and meticulous reading of Pacific and Caribbean literature invigorate and deepen our interest in and appreciation of island literature Vilsoni Hereniko University of Hawai i Elizabeth DeLoughrey brings contemporary hybridity diaspora and globalization theory to bear on ideas of indigeneity to show the complexities of native identities and rights and their grounded opposition as indigenous regionalism to free floating globalized cosmopolitanism Her models are instructive for all postcolonial readers in an age of transnational migrations Paul Sharrad University of Wollongong Australia *Routes and Roots* is the first comparative study of Caribbean and Pacific Island literatures and the first work to bring indigenous and diaspora literary studies together in a sustained dialogue Taking the tidalectic between land and sea as a dynamic starting point Elizabeth DeLoughrey foregrounds geography and history in her exploration of how island writers inscribe the complex relation between routes and roots The first section looks at the sea as history in literatures of the Atlantic middle passage and Pacific Island voyaging theorizing the transoceanic imaginary The second section turns to the land to examine indigenous epistemologies in nation building literatures Both sections are particularly attentive to the ways in which the metaphors of routes and roots are gendered exploring how masculine travelers are naturalized through their voyages across

feminized lands and seas This methodology of charting transoceanic migration and landfall helps elucidate how theories and people travel positioning island cultures in the world historical process In fact DeLoughrey demonstrates how these tropical island cultures helped constitute the very metropolises that deemed them peripheral to modernity Fresh in its ideas original in its approach Routes and Roots engages broadly with history anthropology and feminist postcolonial Caribbean and Pacific literary and cultural studies It productively traverses diaspora and indigenous studies in a way that will facilitate broader discussion between these often segregated disciplines
