Celebrity and the Feminist Blockbuster Anthea Taylor,2017-02-21 In the first book length study of celebrity feminism Anthea Taylor convincingly argues that the most visible feminists in the mediasphere have been authors of bestselling works of non fiction feminist blockbusters *Celebrity* and *The Feminist Blockbuster* explores how the authors of these popular feminist books have shaped the public identity of modern feminism in some cases over many decades Maintaining a distinction between women who are famous because of their feminism and those who later add feminism to their brand Taylor contends that Western celebrity feminism as a political mode of public subjectivity cannot in any simple way be seen as homologous with other forms of stardom Moving deftly from the 1960s to the present focusing on how feminist authors have actively worked to manufacture their public personas she demonstrates that the blockbuster remains crucial to feminist celebrification but is now often augmented with digital media Advancing celebrity studies by placing the figure of the feminist front and centre *Celebrity and the Feminist Blockbuster* is essential reading for all those interested in gender popular feminism and the politics of renown [Feminist Collections](#) ,2016

Center Liah Greenfeld,Michel L. Martin,1988-12-29 There are several concepts within the social sciences that refer to the fundamental realities on which the various disciplines focus their attention The concept of the center as defined by Edward Shils has such a status in sociology for it deals with and attempts to provide an answer to the central question of the discipline the question of the constitution of society Center is a commonly used term with a variety of meanings According to editors Liah Greenfeld and Michel Martin center carries a twofold meaning when used as a concept In its first sense it is a synonym for central value system referring

to irreducible values and beliefs that establish the identity of individuals and bind them into a common universe In its second sense center refers to central institutional system the authoritative institutions and persons who often express or embody the central value system Both meanings imply a corresponding idea of periphery referring both to the elements of society that need to be integrated and to institutions and persons who lack authority The original essays compiled in this volume examine and apply the concept of the center in different contexts The contributors come from a broad range of disciplines classics religion philosophy history literary criticism anthropology political science and sociology which serves to underscore the far reaching significance of the Shilsian theory of society The interrelated subsets of the center periphery theme addressed here include symbolic systems intellectuals the expansion of the center into the periphery parallel concepts in the work of other scholars besides Shils and the paths of research inspired by these concepts The volume features an introspective essay by Shils himself in which he reexamines his central ideas in the light of new experiences and the ideas of others some of them contained in this volume By drawing together such diverse scholars around a unified idea this collection achieves a cohesion that makes it an exciting contribution to the comparative analysis of social and cultural systems A collective effort in social theory Center Ideas and Institutions is a testimony to the breadth and complexity of one of man's ideas

Jihad Diego Gambetta,Steffen Hertog,2017-11-28 A groundbreaking investigation into why so many Islamic radicals are engineers The violent actions of a few extremists can alter the course of history yet there persists a yawning gap between the potential impact of these individuals and what we understand about them In Engineers of Jihad Diego Gambetta and Steffen Hertog uncover two unexpected facts which they imaginatively leverage to narrow that gap they find that a disproportionate share of Islamist radicals come from an engineering background and that Islamist and right wing extremism have more in

common than either does with left wing extremism in which engineers are absent while social scientists and humanities students are prominent Searching for an explanation they tackle four general questions about extremism Under which socioeconomic conditions do people join extremist groups Does the profile of extremists reflect how they self select into extremism or how groups recruit them Does ideology matter in sorting who joins which group Lastly is there a mindset susceptible to certain types of extremism Using rigorous methods and several new datasets they explain the link between educational discipline and type of radicalism by looking at two key factors the social mobility or lack thereof for engineers in the Muslim world and a particular mindset seeking order and hierarchy that is found more frequently among engineers Engineers presence in some extremist groups and not others the authors argue is a proxy for individual traits that may account for the much larger question of selective recruitment to radical activism Opening up markedly new perspectives on the motivations of political violence Engineers of Jihad yields unexpected answers about the nature and emergence of extremism
