Lear 55 ER

A word about Oxygen: Most of all of us have heard of the Lear 35 that crashed in the North Central U.S. after flying for several hours with a load of diseased occupants aboard. The sad thing is that it did not have to happen. A quick preflight of the Oxygen System would have prevented this tragedy. Remember, pressure trapped in the lines can cause the Oxygen Pressure Gauge to read in the green when the Oxygen Valve is turned off. Check your mask and watch for a drop in the pressure gauge. Twenty seconds of caution may save your life.
