Artificial Intelligence and Imaging for Oncology Poonam Yadav, Zhimin Li ,Yuxiang Zhou,2025-02-18 Recent progress in artificial intelligence AI and advanced
imaging techniques have brought about exciting diagnostic and therapeutic opportunities in oncology More and more state of
the art CT PET and MRI imaging techniques are being applied to tumor imaging and new interdisciplinary field such as MR
LINAC is booming We feel there s an urgent need to organize a Research Topic to highlight the application of AI and imaging
for various oncology branches such as radiation therapy as we are witnessing an accelerated integration of imaging and
therapy to improve the care of cancer patients Imaging has also been the backbone of the oncology world It is used for
diagnosis as well as planning MRI has a superior soft tissue contrast but lacks the electron density information for the dose
calculation alternative approaches use synthetic CT for dose calculation The development of the MRI guided system and
online adaptation can be considered as the bridge between many specialties starting from learning about MRI safety by the
therapy physicist to the use of AI for robust planning Active research is done to improve the images advanced MRI
techniques Nuclear medicine and PET MRI synthetic images CBCT for dose calculation for clinical workflows However all
these topics have a lot of room for exploration
