Carrying Capacity

- In this case
- In the case of the upper population, the carrying capacity is determined by the amount of food available

Introduction: Population Density is the number of individuals in a population per unit of space. Factors limiting growth and affecting carrying capacity are the density-dependent or density factor. These limiting factors are divided into **density-dependent limiting factors**.

Question: How does a density-dependent limiting factor affect carrying capacity?

1. **Challenge question:** What do you think would happen if a density-dependent limiting factor changed?

Population would increase

2. **Challenge question:** A drought that is both high in spring months, leaving less food available for rabbits, may also affect the environment's carrying capacity.

Population will increase from which will affect the carrying capacity to a decrease in carrying capacity.

3. **Challenge question:** How do you think the carrying capacity will change? **Students:** carrying capacity will be the carrying capacity.

4. **Challenge question:** How do you think the amount of space available in the habitat affects how many individuals the environment can support?

The larger the space available the larger the carrying capacity will be.

5. **Challenge question:** Why do you think limiting a population's space decreases the carrying capacity?

The carrying capacity of the environment will decrease.

6. **Challenge question:** What do you think would happen if another density-dependent limiting factor changed?
