Leedy And Ormrod 2013:

Introduction to Educational Research Craig A. Mertler, 2021-11-14 This Third Edition of Craig Mertler's practical text helps readers every step of the way as they plan and execute their first educational research project. Offering balanced coverage of qualitative and quantitative methods, an emphasis on ethics, and a wealth of new examples and concrete applications, the new edition continues to use conversational nontechnical language to help students clearly understand and apply research concepts, principles, procedures, and terminology. Expanded coverage of foundations of research, an increased focus on integrating qualitative and quantitative research, and updated coverage of research questions and the tools of qualitative research bring the book thoroughly up to date, while streamlined coverage of statistics shows students how to do quantitative analysis in a straightforward way.

Handbook of Research on Connecting Research Methods for Information Science Research Ngulube, Patrick, 2019-12-13 In today's globalized world, viable and reliable research is fundamental for the development of information. Innovative methods of research have begun to shed light on notable issues and concerns that affect the advancement of knowledge within information science. Building on previous literature and exploring these new research techniques are necessary to understand the future of information and knowledge. The Handbook of Research on Connecting Research Methods for Information Science Research is a collection of innovative research on the methods and application of study methods within library and information science. While highlighting topics including data management, philosophical foundations, and quantitative methodology, this book is ideally designed for librarians, information science professionals, policymakers, advanced level students, researchers, and academicians seeking current research on transformative methods of research within information science.

Proceedings of the International Conference on Business and Management Dynamics 2016: Sustainable economies in the information economy Joy E. Akahome, Michael Twum-Darko, Cyril Ogbokor, Nyaniso Mfusi Zonke, T. Sethibe, R. Steyn, Esme Mohammed, Renier Steyn, L.B. Nguenang, Mamorena Lucia Matsoso, Henry N. Ozuru, Julius Akaba, Patient Rambe, Edem Korku Agbobli, Henri-Vincent Ndjave-Ndjoy, Regis Muchemwa, Andre de la Harpe, Konosoang Mpiti, Ayodeji Afolayan, 2016-12-31 Cape Town, South Africa. 7 Sept 2016 - 8 Sept 2016. Theme: Sustainable economies in the information economy. Purpose: To share the quality academic papers presented at the International Conference on Business and Management Dynamics (ICBMD) held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town. As grey literature, the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates.

Methodology The methodology used varies from researcher to researcher but is suitable for the studies conducted. Thus, on the one hand, studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data. On the other hand, studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data. However, there were

some academic papers which used mixed methodology because of the nature of the study Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology Contribution made to scholarship The articles come from individual researchers and each article in the proceedings is unique Mostly there is no general argument leading from one contribution to the next However it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth With regard to human capital development papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors Furthermore it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation With regard to technology and big data impact on organisational performance it was evident that system performance memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness Target audience The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics information management business education development studies social sciences and technology It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment

descriptive case study investigated the phenomenon of tax practitioner filing fraudulent earned income tax credit claims on behalf of a client. The study took place in Dallas Fort Worth metropolitan area in Texas in the United States and thirty tax practitioners in the Dallas Fort Worth area in Texas were recruited in a non probability purposeful sampling technique. Eighteen professional tax preparers with an average age of 50.5 years and tax practitioner experience of 11.05 years were interviewed face to face in a one on one setting within the Dallas Fort Worth metropolitan area. The research explored paid tax practitioners' perception regarding fraudulent earned income tax credit claims (EITC). The following categories were determined: practitioners' knowledge of EITC rules about compliance and due diligence; knowledge and training of EITC; due diligence program; are vital elements for successful program; workplace culture is influenced by external environment factor; and tax practitioners' decision making choices influence taxpayer behavior. This result of this study may inform stakeholders of behavioral factors that might be necessary to improve EITC claims compliance among all stakeholders.

Strategies for Successful Small Business Ownership in an Unstable Economy Dr. Chris Akaeze, Dr. Nana Akaeze, 2016-12-09 Since early 1960s Nigeria economy has been unstable and monolithic centered on crude oil production and export. Instability of Nigeria economy is contributory to why only less than 20 percent small startup businesses survive the first five years. In spite of the unstable business environment, owners created approximately 17.3 million small businesses across Nigeria and employed a total of approximately thirty-two million workers with contribution of about 45 percent to the GDP. Based on theory of constraints, the purpose of this qualitative multiple case study was to explore strategies required by some small business owners to survive Nigeria's unstable economy beyond five years. Data were collected through semistructured interviews with three small business owners who had succeeded in business beyond the first five years from three different regions in Nigeria. The business strategies may help prospective and existing Nigerian small business owners improve profit and sustain business for survival beyond five years.

How Ants Build Pyramids Karl R. Rabes, 2019-08-07 Karl R Rabes explores the performance impact of differing task designs in crowdsourcing especially micro task markets. Based on several exploratory literature reviews, the manuscript applies the task technology fit theory and numerous quasi experiments to show which tasks can be successfully outsourced to the crowd. It is revealed how a task design has an influence on solution quality taking into account respective task technology and individual characteristics and clearly delineates the differences in objective quality and subjective fit evaluations within and between task designs for micro task markets.
