The Routledge Companion to Historical Theory Chiel van den Akker, 2021-11-15 This Companion provides a wide ranging and up to date overview of the conceptual issues that history as a discipline and mode of thought gives rise to The book offers both historical and systematic treatments of these issues as well as addressing their contemporary relevance Structured in three parts Modes and Schools of Historical Thought Epistemology and Metaphysics of History and Issues and Challenges in Historical Theory it offers the reader a wide scope and expert treatment of each topic in this vibrant field that can be read in any order An international team of experts both discuss the basis of their topic and present their own view offering the reader a cutting edge contribution while ensuring their chapters are of interest to both students and specialists in the field of historical theory and engaging with the very nature of historical thought the metaphysics of historical existence the politics of history writing and the intelligibility of the historical process The volume is an indispensable companion to the study of history and essential reading for anyone interested in the reflection on the nature of history and our historical existence

Trump Studies Tara Brabazon, Steve Redhead, Runyararo S. Chivaura, 2018-11-24 This book addresses the seismic political events of Donald Trump's presidency and the British vote to leave the EU It explores why citizens vote against their own best interests and

demonstrates the role and value of universities in a time when evidence expertise and facts often dissolve into opinion emotion and fake news

Domination and Emancipation Daniel Benson,2021-11-01 A melancholy defeatism has become a hallmark of critical thought and leftist politics A consequence of this has been an exaggerated focus on domination among critical theorists leaving emancipation along with questions of political organization and strategy undertheorized at best or disregarded as delusional at worst If emancipation still plays a role in critical reflection it is most often in a domesticated form made into a bedfellow of centrist liberalism Recent events necessitate a different outlook especially since the financial collapse of 2008 and the myriad movements emancipatory as much as reactionary it has spawned throughout the world Through a series of dialogues and reflections by leading thinkers scholars and activists *Domination and Emancipation Remaking Critique* seeks to rebuild the emancipatory pole of critique and bring forward theoretical work that is in step with the struggles and aspirations of the moment

Brouhaha Lionel Ruffel,Raymond N. MacKenzie,2018-01-31 Within the hypermediated age where knowledge production is decentered and horizontal the experience of lived time has become a concordance of temporalities The literary imagination which was emblematic of modernity and thoroughly connected to the book as a support structure has now become integrated within a much vaster regime of publication Thought concerning the world is from now on a thought concerning a plurality of worlds By way of six guiding threads exposition media controversy publication institutionalization archaeology this essay describes the transformation of cultural forms and visions of history

The Politics of Common Sense Aasim Sajjad Akhtar,2018-02-01 This work offers a refreshingly different perspective on Pakistan it documents the evolution of Pakistan s structure of power over the past four decades In particular how the military dictatorship headed by General Zia ul Haq 1977 1988 whose rule has been almost exclusively associated with a narrow agenda of Islamisation transformed the political field through a combination of coercion and consent production The Zia regime inculcated within the society at large a common sense privileging the cultivation of patronage ties and the concurrent demeaning of counter hegemonic political practices which had threatened the structure of power in the decade before the military coup in 1977 The book meticulously demonstrates how the politics of common sense has been consolidated in the past three decades through the agency of emergent social forces such as traders and merchants as well as the religious political organisations that gained in influence during the 1980s

Assessing University Governance and Policies in Relation to the COVID-19 Pandemic Alaali, Mansoor A.,2021-09-10 In response to the COVID 19 pandemic universities around the globe have taken numerous extraordinary measures and implemented many changes to their strategic operational and academic activities Currently there is a transformation taking place from the emergency decision making in the early stages of the pandemic towards reflection and resolution on how the past months can shape governance and strategy Higher education institutions have been facing challenges with the alignment of their university governance for their strategic and operational plans Presently university leaders have prioritized risk management and financial management over all else

Unfortunately due to these priorities university responses to the pandemic took the top down approach of management rejecting the shared governance structures and collegial practices of the institutions The pandemic has accelerated the openness to change by creating an emergency or steering response team led by university presidents and provosts with sub teams focusing on operations and other academic advisory groups working together to deal with the fast rising scenarios The consequence is a clear flow of information and strong communication across the institution which sequentially builds on mechanisms to respond to the secondary effects of the pandemic Moreover higher education institutions are continuously facing challenges with their strategic alignment of business objectives in order to have a diverse educational system in response to the pandemic

Assessing University Governance and Policies in Relation to the COVID 19 Pandemic presents the latest research and studies investigating information on university governance and adapting previous existing and proposed models for the current pandemic This book is comprised of chapters contributed by various leading international authors to discuss and analyze all aspects of university governance in relation to their impact on strategies in finance sustainability academic issues research faculty and students leadership campus employment and recruitments and more This is an essential text for university presidents strategic planning authorities in universities college deans and academic department chairpersons government authorities and policymakers researchers students and academicians

Molecular Red McKenzie Wark, 2015-04-21 In *Molecular Red* McKenzie Wark creates philosophical tools for the Anthropocene our new planetary epoch in which human and natural forces are so entwined that the future of one determines that of the other Wark explores the implications of Anthropocene through the story of two empires the Soviet and then the American The fall of the former prefigures that of the latter From the ruins of these mighty histories Wark salvages ideas to help us picture what kind of worlds collective labor might yet build From the scientific pioneers who were trying to transform science during the Russia Revolution to visionaries contemplating cyborg possibilities and science fiction dreams in late 20th century California *Molecular Red* not only looks at the crisis of climate change that we face but also how we might be able to understand it and how we might salvage some hope out of the wreckage

Language Teacher Education Beyond Borders Fernando Zolin Vesz, Darío Luis Banegas, Luciana C. de Oliveira, 2024-08-22 This volume looks at the preparation of future critical language teachers in the face of an increasingly multilingual and transcultural contemporary world This is seen through the lens of the collapse of Nation State borders that crumble in the face of migration and the intense flow of languages that comes with it It brings together international research that problematizes theorizes re positions and re conceptualizes myriad structural systemic ideological political and pedagogical issues that intersect with the possibilities and impossibilities of the development of language teachers agency The volume examines the needs of linguistically diverse student populations and considers the socio cultural and socio political barriers that interfere with the exercise of teacher agency for social justice in language classrooms It offers a theoretical and empirical overview of how language teacher education has addressed

all students of Sociology and Sociological Theory Play Among Books Miro Roman,Alice_ch3n81,2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science Critical theory and social pathology Neal Harris,2022-11-29 In the neoliberal world of the twenty first century the progressive academy urgently needs a vehicle for normative social research Critical theory once answered this call but today its programme is in crisis The pathologies of recognition approach popular among contemporary critical theorists aids neoliberalism rather than challenging it in part because it is unable to grasp the structural nature of power To offer an alternative this book returns to the work of Erich Fromm and Herbert Marcuse using it as the basis for a revived social theoretical foundation As the first generation of critical theorists knew thought itself can be reified our imaginations debased and our desires artificially induced We need to think beyond recognition and embrace a more potent and aggressive form of social critique true to the founding spirit of the Frankfurt School **Critical theory and sociological theory** Darrow Schecter,2019-07-29 Democracy in the twenty first century faces a number of major challenges populism neoliberalism and globalisation being three of the most prominent This book examines such challenges by investigating how the conditions of democratic statehood have been altered at several key historical intervals since 1945 It demonstrates that the formal mechanisms of democratic statehood such as elections have always been complemented by civic cultural educational socio economic and constitutional institutions that mediate between citizens and state authority Rearticulating critical theory with a contemporary focus the book shows why a sociological approach is urgently needed to address conceptual deficits and explain how the formal mechanisms of democratic statehood need to be complemented and updated in new ways today **Critical Theory and Economics** Robin Maialeh,2023-03-23 This book expands upon a range of economic insights within the overall context of critical theory particularly with respect to the question of socioeconomic inequalities and presents an explanation of how critical theory provides a number of interesting perspectives for economists Economic agents deliberately imprisoned in their instrumental rationality as a means to survive under competitive relationships are microscopic constituents of systemic forces which exist beyond their will Despite the subjective rationality of such agents in terms of formally logical transitivity and consistency aggregate market distributional mechanisms also display non rational patterns The crucial aspect of the dynamics of this system consists of the paralysing effect of the high level of socioeconomic inequality which is driven by a permanent struggle for self preservation under competitive rules it is a reminiscence of natural uncivilised relationships that constituted the reproduction process of the whole These reified agents

thus become instruments of their socially constructed powers on the one hand and objects of their existential conditionality on the other Hence the dialectical approach adopted by the author aims to uncover the way in which structurally genetic market forces govern individual behaviour as well as how individual behaviour shapes these structurally genetic forces which together form the transcending principles of unequal distribution This book will be of particular interest to scholars of the political economy philosophy and the methodology of the social sciences especially those concerned with inequality issues This book includes a preface written by Professor Martin Jay
