**The Oxford Handbook of the Archaeology and Anthropology of Rock Art** Bruno David,Ian J. McNiven,2018 Rock art is one of the most visible and geographically widespread of cultural expressions and it spans much of the period of our species existence Rock art also provides rare and often unique insights into the minds and visually creative capacities of our ancestors and how selected rock outcrops with distinctive images were used to construct symbolic landscapes and shape worldviews Equally important rock art is often central to the expression of and engagement with spiritual entities and forces and in all these dimensions it signals the diversity of cultural practices across place and through time Over the past 150 years archaeologists have studied ancient arts on rock surfaces both out in the open and within caves and rock shelters and social anthropologists have revealed how people today use art in their daily lives The Oxford Handbook of the Archaeology and Anthropology of Rock Art showcases examples of such research from around the world and across a broad range of cultural contexts giving a sense of the art s regional variability its antiquity and how it is meaningful to people in the recent past and today including how we have ourselves tended to make sense of the art of others replete with our own preconceptions It reviews past present and emerging theoretical approaches to rock art investigation and presents new cutting edge methods of rock art analysis for the student and professional researcher alike

**Structure from Motion in the Geosciences** Jonathan L. Carrivick,Mark W. Smith,Duncan J. Quincey,2016-07-15 Structure from Motion with Multi View Stereo provides hyperscale landform models using images acquired from standard compact cameras and a network of ground control points The technique is not limited in temporal frequency and can provide point cloud data comparable in density and accuracy to those generated by terrestrial and airborne laser scanning at a fraction of the cost It therefore offers exciting opportunities to characterise surface topography in unprecedented detail and with multi temporal data to detect elevation position and volumetric changes that are symptomatic of earth surface processes This book firstly places Structure from Motion in the context of other digital surveying methods and details the Structure from Motion workflow including available software packages and assessments of uncertainty and accuracy It then critically reviews current usage of Structure from Motion in the geosciences provides a synthesis of recent validation studies and looks to the future by highlighting opportunities arising from developments in

allied disciplines This book will appeal to academics students and industry professionals because it balances technical knowledge of the Structure from Motion workflow with practical guidelines for image acquisition image processing and data quality assessment and includes case studies that have been contributed by experts from around the world **3D Imaging of the Environment** John Meneely,2023-11-01 This is a comprehensive overarching interdisciplinary book and a valuable contribution to a unified view of visualisation imaging and mapping It covers a variety of modern techniques across an array of spatial scales with examples of how to map monitor and visualise the world in which we live The authors give detailed explanations of the techniques used to map and monitor the built and natural environment and how that data collected from a wide range of scales and cost options is translated into an image or visual experience It is written in a way that successfully reaches technical professional and academic readers alike particularly geographers architects geologists and planners FEATURES Includes in depth discussion on 3D image processing and modeling Focuses on the 3D application of remote sensing including LiDAR and digital photography acquired by UAS and terrestrial techniques Introduces a broad range of data collection techniques and visualisation methods Includes contributions from outstanding experts and interdisciplinary teams involved in earth sciences Presents an open access chapter about the EU funded CHERISH Project detailing the development of a toolkit for the 3D documentation and analysis of the combined coastline shared between Ireland and Wales Intended for those with a background in the technology involved with imaging and mapping the contributions shared in this book introduce readers to new and emerging 3D imaging tools and programs **Leica** ,1970 The Leica Manual Willard Detering Morgan, Henry M.
