Electrical Code Prep Course Questions Raymond Lee Franklin,2020-06-25 Welcome to the final step in mastering the National Electrical Code The 2020 National Electrical Code Prep Course Questions This workbook is packed with need to know info This workbook covers more of what you learned in Tables and Calculations Remember repetition is critical in learning the material Once you complete the first half of the workbook you will get tested on the same questions but in random order through 8 self timed practice exams While completing the workbook the candidate will notice their confidence growing and will eventually will be able to locate the necessary codes with lightning speed In my 17 years of electrical trade

experience I have seen people firsthand know how to do the job and yet become very overwhelmed during the testing process The majority of study material on the market today focuses on how to interpret or apply the code it does not teach the candidate how to apply their knowledge to the exam material No other workbook focuses on speed and learning how to apply the code to the test For example if you have 4 min a question and the method applied is to use tabs or the index in the back to retrieve answers Valuable time is being wasted this course will teach you how to answer questions and the most efficient tools to utilize during the testing process Repetition is key in understanding the material and answering questions effectively and efficiently Although not all possible questions can be covered by completing the workbook the candidate will gain the confidence and knowledge to tackle their own questions on a test in the field or in the office With the National Electrical Code changing every 3 years no matter what your skill level is electrical engineer apprentice or somewhere in between everyone can benefit from this system
