Laboratory Techniques in Thrombosis — a Manual J. Jespersen, R.M. Bertina, F. Haverkate, 2013-12-01 The first edition of this manual appeared in 1992 and was entitled ECAT Assay Procedures It was the result of a unique cooperation between experts brought together by the European Concerted Action on Thrombosis and Disabilities ECAT The Concerted Action was at that time under the auspices of the Commission of the European Union The second edition like the first edition deals with diagnostic tests within the field of thrombosis However the second edition has a broader scope because it is no longer limited by the frontiers of ECAT Experts all over the world in and outside ECAT have contributed to this edition The editors are very grateful for their contributions The need for a new edition is obvious Since 1992 new assays have been introduced for research diagnosis and therapy of thrombosis for other assays improvements have been suggested while a few others became redundant The editors waived the radioimmunoassays of thromboglobulin and platelet factor 4 due to the fact that the kits required for these assays are rarely or no longer available Also the PAI 1 activity assay was waived as it is liable to many inconsistencies and to large variations A list of names and addresses of manufacturers marketing the kits and reagents has been compiled together with a list of the recommended nomenclature of quantities in thrombosis and haemostasis in order to facilitate the use of the updated version These lists have been carefully compiled by Johannes J Sidelmann PhD Department of Clinical Biochemistry in Esbjerg Denmark

Standard Treatment Guidelines for Haemodialysis Mr. Rohit Manglik, 2024-05-24 This book outlines the essential treatment protocols monitoring methods and safety measures for patients undergoing haemodialysis with an emphasis on improving outcomes and managing complications

ECAT Assay Procedures A Manual of Laboratory Techniques J. Jespersen, R.M. Bertina, F. Haverkate, 2012-12-06 This book offers a description of current and recently developed laboratory assays in the field of haemostasis and thrombosis It is the result of a unique cooperation between experts from more than 60 institutes in 12 European countries brought together by the ECAT European Concerted Action on Thrombosis and Disabilities under the auspices of the Commission of the European Communities in Brussels Belgium The ECAT which was initiated in 1981 designed and performed three prospective clinical studies to establish haemostatic factors as risk indicators of thrombosis Included were patients with angina pectoris at risk from myocardial infarction patients undergoing angioplasty at risk from re stenosis and patients receiving hip replacement at risk from deep venous thrombosis Assay procedures were chosen training courses for technicians held and essential reagents were supplied from a central source A quality control assessment scheme served to compare assay results both within and between laboratories In the angina pectoris study centres determined most of the assays locally in the other two studies assays were performed centrally The need for further quality assessment in Europe Dr J F Davidson in Glasgow led to a separate activity coordinated by including coagulation inhibitors and plasminogen as risk factors for familial venous thrombosis The Editors hope the ECAT

Assay Procedures book will contribute to further harmonization of haemostasis assays and ultimately to their standardization
