

## Lubrication

- 1 On principle, lubricate the machine before use. Use only the oil supplied with your machine (high grade sewing machine oil). Open the rotary hook cover, remove the needle plate and oil the point marked in red. There are no other lubrication points. To remove the needle plate, see under "Maintenance", page 36.

## Winding the Bobbin

For normal sewing, use preferably medium size thread.

- 2 Slide the electronic speed reducer knob to the bobbin winding position "I".
- 3 **Disengage** the flywheel by retaining it and then simply turning the ring around the coupling hub towards you until the white button in the coupling hub pops out.
- 4 Place the bobbin, **holed side up**, on the bobbin winder and **push the bobbin winder to the right**.
- 5 Pull out one of the two spool pins and put the spool on it.
- 6 Pass the thread around the upper tension device. **Note: The thread take-up lever must be in its highest position.**
- 7 Wind a few turns of thread around the bobbin by hand in the direction shown. Run the machine. **The bobbin will stop automatically when it is full.**
- 8 **Engage** the flywheel simply by pressing the button (a). The flywheel will be engaged automatically.
