The Making of a Global FIFA

Luiz Burlamaqui, 2023-02-20 In 1974 the Brazilian sports official João Havelange was elected FIFA's president in a two round election defeating the incumbent Stanley Rous. The story told by Havelange himself describes a private odyssey in which the protagonist crisscrosses two thirds of the world canvassing for votes and challenging the institutional status quo. For many scholars Havelange's triumph changed FIFA's International Federation of Football Association identity gradually turning it into a global and immensely wealthy institution. Conversely the election can be analyzed as a historical event. It can be thought of as a political window by means of which the international dynamic of a specific moment in the Cold War can be perceived. In this regard this book seeks to understand which actors were involved in the election how the networks were shaped and which political agents were directly engaged in the campaign.
