Linder, 1997 An introduction to cosmology this text has an emphasis on the basic principles of the subject It seeks to explain the application of mechanics thermodynamics and particle physics to questions on the universe as a whole The volume also explores general equations of state unifying the treatment of dust radiation cosmological constant or exotic components and the treatment of inhomogeneities clumpy universe and their effects on observations

The Reception of John Philoponus **Natural Philosophy** Emmanuele Vimercati, 2024-11-14 In some of his most famous works John Philoponus c 490 570 CE confronts numerous aspects of Aristotle's philosophy and science Yet the influence of these reinterpretations and critiques remains under examined This volume fills this gap by uncovering the considerable impact of Philoponus natural philosophy in both the medieval and Renaissance periods Divided into three parts the first part of the volume introduces central concepts in Philoponus philosophy Highlighting the areas of crossover as well as of disagreement with Aristotle chapters dedicate specific attention to Philoponus theories of place matter and vacuum his ideas of motion his discussion of the heavens and the fifth element and his anthropology This is followed in parts two and three by a focus on Philoponus reception in the Middle Ages and the Renaissance respectively Shedding light on the scientific ideas circulating in these periods international experts explore a range of topics from the renewal of Aristotelianism in the Arab world through the medieval Byzantine and Latin traditions to Philoponus appearance in the early works of Galileo Engaging with a number of Philoponus key tracts The Reception of John Philoponus Natural Philosophy is both a much needed study of Philoponus influence and a revealing analysis of how Aristotelian science was received adapted critiqued and mediated throughout the Middle Ages and the Renaissance

God the Creator Robert Cummings Neville, 1992-02-13 God the Creator provides a detailed exposition of a conception of God as the creator of everything determinate It does not defend an established conception such as the Thomist the Calvinist or the Process theological idea but rather elaborates the ancient theme of creation ex nihilo in a new form appropriate to the contemporary world Part one is a rigorous philosophical development of the idea of God as creator ex nihilo arguing that an adequate solution to the problem of the one and the many demands such a conception This part includes a dialectical examination of contemporary and classical theories of being Part two asks how one can have knowledge of the kind of God described previously it deals with experience analogy and dialectic Part three applies the conception developed in part one to fundamental religious conceptions such as the object of worship the nature of religion and the practices of private and public religious life It presents theories arising from the conception of creation ex nihilo for the interpretation of religious concern conversion faith certainty solitude bliss service liturgy providence evangelism dedication reconciliation brotherhood discipline the integration of public and private religion relative to other dimensions of life freedom love and glory Though the language arises from the Christian tradition and expresses an orthodox strand of that religion the argument weaves throughout the concerns of many world religions

Cosmology's

Century P. J. E. Peebles, 2022-04-26 From Nobel Prize winning physicist P J E Peebles the story of cosmology from Einstein to today Modern cosmology began a century ago with Albert Einstein's general theory of relativity and his notion of a homogenous philosophically satisfying cosmos Cosmology's Century is the story of how generations of scientists built on these thoughts and many new measurements to arrive at a well tested physical theory of the structure and evolution of our expanding universe In this landmark book one of the world's most esteemed theoretical cosmologists offers an unparalleled personal perspective on how the field developed P J E Peebles was at the forefront of many of the greatest discoveries of the past century making fundamental contributions to our understanding of the presence of helium and microwave radiation from the hot big bang the measures of the distribution and motion of ordinary matter and the new kind of dark matter that allows us to make sense of these results Taking readers from the field's beginnings Peebles describes how scientists working in independent directions found themselves converging on a theory of cosmic evolution interesting enough to warrant the rigorous testing it passes so well He explores the major advances some inspired by remarkable insights or perhaps just lucky guesses as well as the wrong turns taken and the roads not explored He shares recollections from major players in this story and provides a rare inside look at how science is really done A monumental work Cosmology's Century also emphasizes where the present theory is incomplete suggesting exciting directions for continuing research

Peacock,1999 A comprehensive and authoritative introduction to contemporary cosmology for advanced undergraduate and graduate students *The Self-Actualizing Cosmos* Ervin Laszlo,2014-03-02 An exploration of the current revolution in scientific thought and the newest scientific findings in support of the Akashic field Explains how the new Akasha paradigm recognizes the interconnection of all things in space and time through the quantum resonance of the Akashic field Reveals the cosmos to be a self actualizing self organizing whole bringing forth life and consciousness in countless universes Explores the latest discoveries in the sciences of life mind and cosmos Science evolves through alternating phases of normal science and radical shifts that create scientific revolutions We saw this at the turn of the 20th century when science shifted from a Newtonian worldview to Einstein s relativity paradigm and again with the shift to the quantum paradigm Now as we recognize the nonlocal interconnection of all things in space and time we find our scientific worldview shifting once again With contributions by physicists Paul A LaViolette and Peter Jakubowski pioneering systems scientist Ervin Laszlo explores the genesis of the current revolution in scientific thought and the latest findings in support of the Akashic field He explains

how the burgeoning Akasha paradigm returns our way of thinking to an integral consciousness a nonlinear mode of understanding that enables us to accept the reality of nonlocal interconnection throughout the world This new inclusive way of understanding reaffirms the age old instinctive comprehension of deep connections among people societies and nature and it integrates and transcends classical religious and scientific paradigms Providing examples from cutting edge science of quantum resonance based interactions among all living systems Laszlo shows the cosmos of the Akasha to be a self actualizing self organizing whole where each part is in coherence with all others and all parts together create the conditions for the emergence of life and consciousness The advent of the Akasha paradigm marks a new stage in science s understanding of the fundamental nature of the world and offers unique guidance for contemporary efforts to create a peaceful and sustainable world
