need to evaluate select and specify the best finish materials for any job. This powerful visual resource combines hundreds of illustrations from Architectural Graphic Standards with corresponding building material performance and specification information from AIA's MASTERSPEC published by ARCOM. Use this book during the schematic and design development phases of a project and as an indispensable aid for product selection and specification. Essential for architects, interior designers and building designers, this vital reference provides information to make informed decisions about specific design goals such as affordability, environmental friendliness, durability, fire resistance and esthetic success. Features include: Unique source of independent in-depth building product performance information; the one source that gives you reliable building product information before you consult with manufacturers; Covers a full range of standard finish materials and includes selection criteria, details, typical product sizes and installation and maintenance data; Provides current standards based on research by government association and independent testing organizations as well as the input of experienced architects and specifiers. Architectural Graphic Standards has served the design community for decades as a virtual bible for architectural detailing. MASTERSPEC Evaluations have long comprised one of the best resources available for building product selection and specification. Consolidating the strong points of both into this new desktop reference is an act of sheer brilliance. Martin M. Bloomenthal, FAIA, CCS, CSI, Principal, The Hillier Group, Princeton, New Jersey. *Construction Inspection Handbook*, James J. O'Brien, 2012-12-06. Since the publication of the third edition in 1989, changes in quality control assurance have affected the construction industry. This new fourth edition includes revised and new material relating to Section A, specifically Total Quality Management, ISO 9000 and quality control. The Codes and Standards, Section Contract Documents and Legal Documents Sections have also been extensively updated. *Construction Inspection Handbook* systematically reinstates the importance of quality by providing you with a comprehensive quality assurance plan. At the same time, this ensures that your construction projects meet contract specifications, comply with Construction Specification Institute standards and conform with safety requirements and legal codes. *Furnishing | Zoning*, Eva Herrmann, Marcus Kaiser, Tobias Katz, 2014-05-22. What is the process of forming rooms, which elements are used and how are room-shaping components defined? The fourth volume in the SCALE series, *Furnishing | Zoning*, deals with the relationships between building typology and building structure and between spatial composition and interior design. The relationship between the briefing and the catalogue of requirements and between shell construction and fit-out is elucidated. Connections at walls, ceilings and floors are explained in detail and illustrated with case studies of selected projects. In addition, the authors demonstrate how a well-designed sequence of spaces can create added value by means, for example, of the choice of materials and the lighting scheme or adaptability to accommodate new functions. Following the introductory chapter on the subject of space, the volume is divided into chapters on floors, walls, ceilings and furniture and fixtures. *Furnishing | Zoning* examines the subject from different professional angles and thereby provides valuable support for practical interior design.
