Kenya and Dar Tanzania The Danish former ranger Stig Jansen is located in the country in civilian affairs and soon he s unwittingly whirled into what s going to prove to be the precursor to one of the Worlds largest conspiracies involving the corrupt local government power the CIA sinister parts of the German government Saddam Hussein s regime in Iraq and a Danish colonel in the Defense Intelligence Agency He s pulled around in the strange circus and his reactions and actions will be crucial for all the people he comes into contact with during his stay Through his escape from the Kenyan military who accuses him of terrorism and murder he is driven along with the beautiful Scottish Red Cross employee Jane into the wilderness where his abilities and skills as former elite soldier come into their own and the flight progresses then into a nightmare where the difference between friend and foe is subtle *Fire Engines* Eddie Baker,2018-08-23 More complex and imposing than any other vehicle in the British emergency services the fire engine has a long and interesting history The earliest water pumps had been developed by the eighteenth century basic manual pumps that had to be hauled around by people or horses and were often only used on fire insured premises In the nineteenth and twentieth centuries horse drawn steam powered fire engines and eventually motorised fire engines came to revolutionise firefighting offering far greater versatility and the brigades came to be run by the municipalities In this beautifully illustrated introduction Eddie Baker charts the history of fire engines and their variants and the increasingly complex equipment they have carried such as high rise ladders and high pressure hoses He also explains the wider history of the fire service and how the engines have been shaped by its needs and most importantly those of the firefighters themselves Atmospheric Aerosols Hayder Abdul-Razzak,2012-09-12 The book is divided into two sections The first section presents characterization of atmospheric aerosols and their impact on regional climate from East Asia to the Pacific Ground based air born and satellite data were collected and analyzed Detailed information about measurement techniques and atmospheric conditions were provided as well In the second section authors provide detailed information about the organic and inorganic constituents of atmospheric aerosols They discuss the chemical and physical processes temporal and spatial distribution emissions formation and transportation of aerosol particles In addition new measurement techniques are introduced This book hopes to serve as a useful resource to resolve some of the issues associated with the complex nature of the interaction between atmospheric aerosols and climatology *Petroleum and Mineral Resources* Fuad M. Khoshnaw,2012-11-30 The Kurdistan region of Northern Iraq is one of the emerging areas in the Middle East rich in oil gas and mineral resources as well as underground water However until recently the political and security issues were such that the region was unable to take advantage of these resources Nowadays Kurdistan is emerging as one of the fastest developing areas in the Middle East with its universities playing a major role in this process This book contains the proceedings of the First International Conference on Petroleum and Mineral Resources held at Koya University in Kurdistan Iraq Topics covered include Petroleum Exploration Drilling and Well Design Gas Production Petrochemical Engineering Geological Structures Metal Ore Extraction Resource

and Production Engineering Multiphase Flow Processing of Oil and Gas Hydrocarbon Transportation Pipelines Field Support Facilities Project Development and Management Safety Management Environmental Management Operation Economics and Investment Regulations and Legislation Corrosion Infrastructure Protection Biomass to Biofuels S.

Syngellakis, 2014-10-31 Biomass is a continuously renewed source of energy formed from or by a wide variety of living organisms Through biochemical and thermochemical processes it is converted into gaseous liquid or solid biofuels which already meet a significant share of the current world energy needs Because of their contribution to the sustainability of energy supply reduction of green house gas emissions as well as local employment and energy self reliance research interest and activity in enhancing biofuel energy output efficiency and performance remain strong The first part of this volume comprises five articles mainly concerned with biomass resource potential and management More specifically the reported investigations assess grass and lawn substrates rapeseed straw and microalgae from Upflow Anaerobic Sludge Blanket UASB reactor effluents as possible sources of biogas bioethanol and biodiesel respectively The emphasis in the subsequent group of eleven articles is on biomass conversion processes aiming at assessing performance as well as output quality and diversity Biodiesel a fluid biofuel produced from biomass with high lipids such as rapeseed oil sunflowers and soy beans is the focus of two articles the first investigates the effect of biodiesel blending with diesel fuel on diesel engine performance and emissions the second assesses the efficiency of catalytic reforming of biodiesel into a gaseous mixture used directly as Solid Oxide Fuel Cell SOFC fuel In the last three articles the prospects of biofuels as viable sources of energy are examined within European contexts This volume addresses a significant number of important themes and thus combines subject breadth and density with in depth study of biomass resourcing and processing as well as the issue of biofuel and renewable energy sustainability
