Friday 8th November 2013 Maths Paper:

Learning from Singapore Pak Tee Ng, 2017-01-12 Learning from Singapore tells the inside story of the country's journey in transforming its education system from a struggling one to one that is hailed internationally as effective and successful. It is a story not of the glory of international test results but of the hard work and tenacity of a few generations of policy makers, practitioners and teacher trainers. Despite its success, Singapore continues to reform its education system and is willing to deal with difficult issues and challenges of change. Citing Singapore's transformation, author Pak Tee Ng highlights how context and culture affect education policy formulation and implementation. Showing how difficult education reform can be when a system needs to negotiate between competing philosophies, significant trade-offs or paradoxical positions, this book explores the successes and struggles of the Singapore system and examines its future direction and areas of tension. The book also explores how national education systems can be strengthened by embracing the creative tensions generated by paradoxes such as the co-existence of timely change and timeless constants, centralisation and decentralisation, meritocracy and compassion, and teaching less and learning more. Learning from Singapore brings to the world the learning from Singapore: what Singapore has learned from half a century of educational change and encourages every education system to bring hope to and secure a future for the next generation.

Disorder and the Disinformation Society Jonathan Paul Marshall, James Goodman, Didar Zowghi, Francesca da Rimini, 2015-04-17 This book is the first general social analysis that seriously considers the daily experience of information disruption and software failure within contemporary Western society. Through an investigation of informationalism defined as a contemporary form of capitalism, it describes the social processes producing informational disorder. While most social theory sees disorder as secondary, pathological or uninteresting, this book takes disordering processes as central to social life. The book engages with theories of information society which privilege information order, offering a strong counterpoint centred on disinformation. *Disorder and the Disinformation Society* offers a practical agenda, arguing that difficulties in producing software are both inherent to the process of developing software and in the social dynamics of informationalism. It outlines the dynamics of software failure as they impinge on information workers and on daily life, explores why computerized finance has become inherently self-disruptive, asks how digital enclosure and intellectual property create conflicts over cultural creativity and disrupt informational accuracy and scholarship, and reveals how social media can extend but also distort the development of social movements.
