**Inventing Authenticity** Carrie Helms Tippen, 2018-08-12 In *Inventing Authenticity* Carrie Helms Tippen examines the rhetorical power of storytelling in cookbooks to fortify notions of southernness Tippen brings to the table her ongoing hunt for recipe cards and evaluates a wealth of cookbooks with titles like *Y all Come Over* and *Bless Your Heart* and famous cookbooks such as Sean Brock's *Heritage* and Edward Lee's *Smoke and Pickles* She examines her own southern history grounding it all in a thorough understanding of the relevant literature The result is a deft and entertaining dive into the territory of southern cuisine black eyed peas and cornbread fried chicken and fried okra pound cake and peach cobbler and a look at and beyond southern food tropes that reveals much about tradition identity and the yearning for authenticity Tippen discusses the act of cooking as a way to perform and therefore reinforce the identity associated with a recipe and the complexities inherent in attempts to portray the foodways of a region marked by a sometimes distasteful history *Inventing Authenticity* meets this challenge head on delving into problems of cultural appropriation and representations of race thorny questions about authorship and more The commonplace but deceptively complex southern cookbook can sustain our sense of where we come from and who we are or who we think we are *Recipes and Everyday Knowledge* Elaine Leong, 2018-11-28 Across early modern Europe men and women from all ranks gathered medical culinary and food preservation recipes from family and friends experts and practitioners and a wide array of printed materials Recipes were tested assessed and modified by teams of householders including masters and servants husbands and wives mothers and daughters and fathers and sons This much sought know how was written into notebooks of various shapes and sizes forming treasuries for health each personalized to suit the whims and needs of individual communities In *Recipes and Everyday Knowledge* Elaine Leong situates recipe knowledge and practices among larger questions of gender and cultural history the history of the printed word and the history of science medicine and technology The production of recipes and recipe books she argues were at the heart of quotidian investigations of the natural world or household science She shows how English homes acted as vibrant spaces for knowledge making and transmission and explores how recipe trials allowed householders to gain deeper understandings of sickness and health of the human body and of natural and human built processes By recovering this story Leong extends the parameters of natural inquiry and productively widens the cast of historical characters participating in and contributing to early modern science **Eating and Ethics in Shakespeare's England** David B. Goldstein, 2013-11-07 David B Goldstein argues for a new understanding of Renaissance England from the perspective of communal eating Rather than focus on traditional models of interiority choice and consumption Goldstein demonstrates that eating offered a central paradigm for the ethics of community formation The book examines how sharing food helps build demarcate and destroy relationships between eater and eaten between self and other and among different groups Tracing these eating relations from 1547 to 1680 through Shakespeare Milton religious writers and recipe book authors Goldstein shows that to think about

eating was to engage in complex reflections about the body's role in society. In the process he radically rethinks the communal importance of the Protestant Eucharist. Combining historicist literary analysis with insights from social science and philosophy, the book's arguments reverberate well beyond the Renaissance. Ultimately *Eating and Ethics in Shakespeare's England* forces us to rethink our own relationship to food. — *Go Cookbook* Sau Sheong Chang, 2023-09-13

Using feminist and ecocritical approaches alongside recent historical work on early modern trade and commerce, this volume focuses on early modern manuscripts whose travels can be traced from one location to another. It illustrates how recipes came to blend newly encountered ingredients and practices with long-established healthcare methods. In the process, it offers attention to both the English countryside and the American colonies to expand what is often a London-centered view of English healthcare. Tracing the circulation of women's domestic knowledge and considering the availability of ingredients, this work shows how mobility brought new methods and materials to home healthcare, which in turn influenced how women and their families envisioned their relationships to their environment, their bodies, and their nation. — **A Philosophy of Recipes** Andrea Borghini, Patrik Engisch, 2021-12-16

This volume addresses the nature and identity of recipes from a cross-disciplinary perspective. Contributors study the values and norms guiding the naming, production, and consumption of recipes, scrutinizing their relationship to territory, makers, eaters, and places of production. Along the way, they uncover the multifaceted conceptual and value-laden questions that a study of recipes raises regarding cultural appropriation and the interplay between aesthetics and ethics in recipe making. With contributors specializing in philosophy, law, anthropology, sociology, history, and other disciplines, this volume will be of vital importance for those looking to understand the complex nature of food and the way recipes have shaped culinary cultures throughout history. — **Papyri Osloenses ...: Magical papyri** Samson Eitrem, Leiv Amundsen, 1925
