

Quidway® NetEngine 40 Series Universal Switching Router Route Switching Units

Overview

The Route Switching Unit (SRU) is the core of the Quidway® NetEngine 40 universal switching router (USR) series (abbreviated as NE40).

NE40-8 and NE40-4 provide 2 slots, where one or two SRUs can be located. It is suggested that you configure two SRUs in order to implement SRU redundancy and enhance system reliability. NE40-2 has only one SRU slot, so it does not support SRU redundancy.

When the active SRU runs normally, the standby one is backing up such information in real time as data configuration and status of slot, board, interface, power, fan and protocol. When the active SRU is seriously faulty or is reset manually, the system restores services on the standby one (automatically or by command). Meanwhile, it generates an alarm and records the switchover cause and process in the log file which will be notified to the NMS.
