

## Is A College Degree Worth It?

Some people might say a college degree is worth it because of better paying jobs as well as a open door for opportunity's. That it is not the case, throughout extensive research I can prove to you that you don't need a college degree to be successful you will be better off financially and you will also have a lot of opportunity and they will come fast. There are many factors in why a college degree can be useless.

If you are looking to be financially stable than college is most likely not for you college finances can be a slippery slope with your tuition books and other materials and that's just the start. Also, with that being said you will not be guaranteed six figures by going to college you should try to learn a trade there is a trade shortage and you could make decent money by making this decision (Phetasy). With that being said if you end up picking up a trade you will start making money instantly and you will not have to worry about paying back student loans and worry about college expenses. You could gain a lot of experience and respect by just jumping in a job your into you could easily move up the chain and then you could also talk with the higher ups and get to know them and know what they do and before you know it you will make yourself an asset you will then gain confidences and satisfaction. Most college students come fresh out of high school and they don't have themselves established yet with experience in the workforce and most students in that situation don't have money so they have to take out loans for school (Phetasy). You also have to think about what kind of school in which you want to enroll in that suits your needs and that has your degree program. This could be an issue because some students go into a major and then decide to do something else which that college might not offer now you might be caught up in a bad spot financially because some colleges cost more than others and if you would then have to go to a different school then you would lose a lot of money because you want to pursue your passion. With that being said student loans and expenses are a large portion of the united-states national debt. The average student debt after graduation raised to 33,000 that is a lot of debt build up (bond).

There is always going to be a need for people in the workforce not every person can have million dollar jobs. A lot of graduates are not working in the profession they intended to work in. For example, they figure by going to college they can make themselves more marketable for the career they want but that is not the case. Because in today's society is is not unusual to see people with college degrees most people go to college to receive a degree so they can make themselves stand out. When this happens it will cause a ton of competition between potential employees because they would have to one up each-other and go back to school and get a better degree causing more debt and frustration so they can get hire
