

000000 Lab 02: Assessment Questions

Create a CERT Response Plan for a Typical IT Infrastructure

Student Name: _____ Anthony Nguyen _____

Answer

This task and integration strategy requires building and implementing a CERT response plan. This involves identifying, preparing for potential cybersecurity incidents and preventing them or limiting their impacts.

Like any other IT infrastructure, the more you can plan, prepare, and practice, the more prepared you are to handle any such situation. This lets practitioners be able to apply their cybersecurity incident response capabilities to handling incidents specific to a portion of the overall infrastructure.

Lab Assessment Questions

1. What are incident response capabilities or security measurements for your organization for this portion of the network? Describe how your CERT response plan supports your system.

Many systems up to date hardware better patches and updates have security to check logs and vulnerabilities from existing security vulnerabilities. Should be possible to have firewall with filter traffic to ensure that unwanted traffic does not reach vulnerable systems.

2. How does a CERT practice an organization respond?

It helps an organization prepare for incidents. With prepared, the organization is able to respond to the incidents faster, quicker and with focused effort.

3. How does a CERT response plan help respond to?

It responds to the incidents through patching and with focused effort.
